How Real Is Race? Carol C. Mukhopadhyay, Rosemary Henze, Yolanda T. Moses, 2013-12-11 How real is race What is biological fact what is fiction and where does culture enter What do we mean by a colorblind or postracial society or when we say that race is a social construction If race is an invention can we eliminate it This book now in its second edition employs an activity oriented approach to address these questions and engage readers in unraveling and rethinking the contradictory messages we so often hear about race The authors systematically cover the myth of race as biology and the reality of race as a cultural invention drawing on biocultural and cross cultural perspectives They then extend the discussion to hot button issues that arise in tandem with the concept of race such as educational inequalities slurs and racialized labels and interracial relationships In so doing they shed light on the intricate dynamic interplay among race culture and biology For an online supplement to How Real Is Race Second Edition [click here](#)

Theology and the Arts Ruth Illman, W. Alan Smith, 2013-06-07 This book brings the emerging fields of practical theology and theology of the arts into a dialogue beyond the bias of modern systematic and constructive theology The authors draw upon postmodern post secular feminist liberation and dialogical dialectical philosophy and theology and their critiques of the narrow modern emphases on reason and the scientific method as the model for all knowledge Such a practical theology of the arts focuses the work of theology on the actual practices that engage the arts in their various forms as the means of interpreting and understanding the nature of the communities and their members as well as the mechanisms

through which these communities engage in transformative work to make persons and neighborhoods whole This book presents its theological claims through the careful analysis of several stories of communities around the world that have engaged in transformational practices through a specific art form investigating communities from Europe the Middle East South America and the U S The case studies explored include Jewish Christian Muslim Druze indigenous and sometimes agnostic subjects involved in visual art music dance theatre documentary film and literature Theology and the Arts demonstrates that the challenges of a postmodern and post secular context require a fundamental rethinking of theology that focuses on discrete practices of faithful communities rather than one dimensional theories about religion **The Biology**
