

Needle threading (C) (D)

1. Raise the presser foot.
2. Raise the needle to its highest position by turning the handwheel toward you.
3. Pull thread from spool through guide 1.

Note: Make sure the thread snaps into the slot of guide 2, and between the thread tensions discs 3.

4. Pull the thread through guides 4, 5, 6 for the right needle and through guides 5, 6 for the left needle.

Note: Make sure that right needle thread (D) passes to the right of thread guide 5 and left needle thread (C) to the left.

5. Pull the thread through the needle eye 7, leaving about 10 cm (4") of spare thread.

Preparations and control

Check that thread has not slipped off the guides nor has broken. Make sure the upper cutter moves correctly against the lower cutter by slowly turning the handwheel toward you. Check that there are no pieces of fabric or thread between the cutters. Turn the handwheel toward you and make sure the threads form the stitch on the stitch finger of the stitch plate. If not, check threading. When the machine has been threaded, close the front cover and lower the presser foot.
