

#### STEP 4 - NOW ADJUST THE SPEED LIMITER TO SLOW .

Next; Start the ATV's engine and have your pupil practice starting off, riding in a straight line, and stopping, with the vehicle under power. Walk along side of the ATV and hold the engine cut out switch cord, or have the pupil ride back and forth between you and another supervisor. Make sure your pupil.

1. Opens the throttle gently when starting off.
2. Releases the throttle and applies the brakes in sequence when stopping.
3. Becomes aware of the distance it takes the vehicle to stop when the engine switch is turned off while the vehicle is moving.

As you approach the end of the practice area, you should again tell the rider to stop the vehicle, and get off, so you can turn it around for him/her. Practice this exercise until your pupil can start off, accelerate, cruise and stop correctly and with confidence.

#### STEP 5 - TURNING

After your pupil has learned to ride the ATV in a straight line and can stop it when he/she wants to, you should teach the pupil now to turn the vehicle. Explain the proper body movements for turning, and let your pupil PRACTICE.

FIRST WITH THE ENGINE OFF, as you push the vehicle from behind.

When turning, watch to make sure your pupil.

1. Shifts his/her weight slightly forward and supports his/her weight on the outer footrest.
2. Leans his/her upper body into direction of turn, pressing down with their opposite leg.

When the rider is able to properly turn the ATV in both directions with the engine off, he/she should practice turning with the vehicle under power. Again, make sure that the throttle limiter is adjusted to provide a low maximum speed capability. Watch closely to make sure the rider is using the proper technique. The rider should practice turning until he/she can do it correctly and with confidence.

#### STEP 6 - PUTTING IT ALL TOGETHER

When your pupil has mastered the basic riding manoeuvres in the previous steps, he/she should practice them all together. Instruct the rider to perform various manoeuvres such as turning right, turning left, stopping....., etc. Mix up the order of these manoeuvres so the pupil will not know what he/she will be asked to do next. Practice this exercise until you are confident the rider has mastered all the basic manoeuvres. The above step will help the first time rider learn the most basic riding techniques. To become a skilled rider, your pupil will need a great deal of practice and instruction after these steps have been completed. After all the riding techniques have been mastered, you can adjust the throttle limiter, to provide higher speed capabilities, according to the riders skill and experience.
