Camarinha-Matos, Hamideh Afsarmanesh, Dario Antonelli, 2019-09-12 This book constitutes the refereed proceedings of the 20th IFIP WG 5.5 Working Conference on Virtual Enterprises PRO-VE 2019 held in Turin Italy in September 2019. The 56 revised full papers were carefully reviewed and selected from 141 submissions. They provide a comprehensive overview of major challenges and recent advances in various domains related to the digital transformation and collaborative networks and their applications with a strong focus on the following areas related to the main theme of the conference: collaborative models, platforms and systems for digital revolution, manufacturing ecosystem and collaboration in Industry 4.0, big data analytics and intelligence, risk performance and uncertainty in collaborative networked systems, semantic data service discovery, retrieval and composition in a collaborative networked world, trust and sustainability analysis in collaborative networks, value creation and social impact of collaborative networks on the digital revolution, technology development, platforms supporting collaborative systems, collective intelligence and collaboration in advanced emerging applications and collaborative manufacturing and factories of the future, e health and care, food and agribusiness and crisis disaster management. **Robotic Safety Systems** Justin Starr, Christopher Quick, 2024-11-14 This book reboots the conversation about all technologies relating to robot safety. It covers key features of industry standards, relevant government regulations, hardware devices, physical safeguards and vendor-specific software implementations including FANUC's Dual Check Safety, ABB's SafeMove and more. **Robotic Safety Systems: An Applied Approach** discusses some of the unique concerns associated with remote I/O and systems designed to be controlled over wide area networks including the internet. It includes annotated example safety configurations and programs that can be customized and loaded and deployed on existing robots, giving the reader tools to immediately apply the lessons learned in this text. The text also provides best practices for using cutting edge systems such as cobots and mobile robotic arms with some autonomy systems that have advanced faster than the regulatory frameworks. Included are real world examples from FANUC, ABB, Universal Robots and Kuka, the most popular brands on the market. Finally, as an appendix to this text, a case study demonstrating proper use of A3 RIA standards is included. This will allow readers to make an informed decision prior to purchasing these expensive references. This book is intended for post-secondary classes at universities with specializations in robotics or robotic engineering. It will also be useful for robot systems integrators, design engineers, consultants, integration experts, robot programmers. **Проектирование автоматизированных систем.
