McGee,Edmund C. Penning-Rowsell,2022-06-30 This Handbook provides a state of the science review of research and practice in the human dimensions of hazards field The Routledge Handbook of Environmental Hazards and Society reviews and assesses existing knowledge and explores future research priorities in this growing field It showcases the work of international experts including established researchers future stars in the field and practitioners Organised into four parts all chapters have an international focus and many include case studies from around the world Part I explains geophysical and hydro meteorological climatological hazards their impacts and mitigation Part II explores vulnerability resilience and equity Part III explores preparedness responses during environmental hazard events impacts and the recovery process Part IV explores policy and practice including governments support provided during and after environmental hazard events and provision of information This Handbook will serve as an important resource for students academics practitioners and policymakers working in the fields of environmental hazards and disaster risk reduction A Geography of Infection Matthew R. Smallman-Raynor,Andrew D. Cliff,J. Keith Ord,Peter Haggett,2022-02-10 The last half century has witnessed two landmark events in medical history The 1970s saw euphoria about the defeat of one of humankind s oldest disease scourges with the global eradication of smallpox To set against this the 2020s are experiencing the pandemic ravages of new viral diseases of which COVID 19 is currently the most potent But it is only the latest of a succession of threats A Geography of Infection explores the distinctive spatial patterns and processes by which such infectious diseases spread from place to place and can grow from local and regional epidemics into global pandemics This resource focuses initially on the local scale of doctors practices and small islands where epidemic outbreaks are slight in the numbers infected and in geographical extent Such local area studies raise two questions First how and where do epidemic diseases emerge and second why do more diseases appear to be emerging now To approach such questions implies a shift in spatial gear from painting epidemics with a fine tipped local brush to an expanded palette on which doctors practices and small islands are replaced by regional and global populations Simultaneously time bands are extended backwards to the origins of civilization and forwards into the twenty first century It eventually leads to a consideration of global pandemics both historical for example plague cholera and influenza and contemporary HIV AIDS and COVID 19 and examines the ways the spread of infection can be prevented All chapters are extensively illustrated with full colour diagrams and maps some of which are in colour for the first time Bringing**

together the authors collective 150 years of experience in research mapping and writing on spatial aspects of medical history this is an invaluable resource for anyone interested in the spread control and eradication of epidemic and pandemic diseases

Cities and the Super-Rich Ray Forrest, Sin Yee Koh, Bart Wissink, 2017-02-28 With the rise of wealth inequalities our cities are changing dramatically This collection critically engages with and advances existing debates on the

super rich and their roles in these transformations An interdisciplinary range of contributions from international experts including sociologists geographers historians discourse analysts and urban studies specialists reveal crucial aspects of the real estate investment practices of the super rich their social spaces in the city as well as the distinct influence of the super rich on the transformation of four key cities London Tokyo Singapore and Hong Kong By drawing together diverse disciplines perspectives and experiences across different geographical contexts this book offers a fresh comparative and nuanced take on the super rich and the 1% city as well as a solid empirically and theoretically grounded basis to think about future research questions and policy implications

The Transition of Religion to Culture in Law and Public Discourse Lori Beaman, 2020-03-27 This book explores the recent trend toward the transformation of religious symbols and practices into culture in Western democracies Analyses of three legal cases involving religion in the public sphere are used to illuminate this trend a municipal council chamber a town hall and town board meetings Each case involves a different national context Canada France and the United States and each illustrates something interesting about the shape shifting nature of religion specifically its flexibility and dexterity in the face of the secular the religious and the plural Despite the differences in national contexts in each instance religion is transformed into culture or heritage by the courts to justify or excuse its presence and to distance the state from the possibility that it is violating legal norms of distance from religion The cultural practice or symbol is represented as a shared national value or activity Transforming the Other into Us through reconstitution is also possible Finally anxiety about the Other becomes part of the story of rendering religion as culture resulting in the impugning of anyone who dares to question the putative shared culture The book will be essential reading for students academics and policy makers working in the areas of sociology of religion religious studies socio legal studies law and public policy constitutional law religion and politics and cultural studies
