Guidebook for Clinical Psychology Interns Gary K. Zammit,James W. Hull,2013-11-21 The internship is the capstone

experience of professional education and training preparatory for the application of psychology in health and human services. It is analogous for the practice of psychology to what the doctoral dissertation represents in the student's development as a scholar. At its best, the internship should be viewed as far more than simply a requirement for one's degree or licensure, a rite de passage for entry into the profession. Rather, it should be regarded by students and faculty alike as a rich opportunity for personal and professional growth, the opportunity to assess and even rethink one's assumptions about human behavior and psychological problems in the context of different client populations, types of problems addressed, and psychological service system environments. In articulating the first formal guidelines for the accreditation of graduate training programs in clinical psychology, a committee of the American Psychological Association comprised of distinguished psychologists of their day asked, "What are the aims of a psychological internship?" The committee replied to that question as follows: "Underlying all of its aims is the principle that the knowledge essential to the practice of clinical psychology cannot be obtained solely from books, lectures, or any other devices which merely provide information about people or about ways of studying them." *Current Catalog*, National Library of Medicine (U.S.), 1993. First multi-year cumulation covers six years, 1965-70.
