Educational Authorities and the Schools Helene Ärlestig, Olof Johansson, 2020-05-28 This book describes and analyses the organisation functions and development of national educational authorities and agencies and the influence they have on local schools in 20 countries around the world It examines the governing chain in the respective countries from both a theoretical and descriptive perspective It does so against the background of the stability and rigour of the governing chains having been challenged with some researchers considering the chain to be broken However the view

that comes to the fore in this book is that the chain is still present and contains both vertical implementation structures and intervening spaces for policy interpretation How schools become successful is important for the individual students as well as the local community and the national state A vast quantity of research has looked at what happens in schools and classrooms At the same time national governance and politics as well as local prerequisites are known to exert influence on schools and their results to a high degree Societal priorities problems and traditions provide variety in how governance is executed This book provides an international overview of the similarities and differences between educational agencies and how their work influences schools

Science Education in Canada Christine D. Tippet, Todd M. Milford, 2019-07-01 This book offers a meso level description of demographics science education and science teacher education Representing all 13 Canadian jurisdictions the book provides local insights that serve as the basis for exploring the Canadian system as a whole and function as a common starting point from which to identify causal relationships that may be associated with Canada's successes The book highlights commonalities consistencies and distinctions across the provinces and territories in a thematic analysis of the 13 jurisdiction specific chapters Although the analysis indicates a network of policy and practice issues warranting further consideration the diverse nature of Canadian science education makes simple identification of causal relationships elusive Canada has a reputation for strong science achievement However there is currently limited literature on science education in Canada at the general level or in specific areas such as Canadian science curriculum or science teacher education This book fills that gap by presenting a thorough description of science education at the provincial territorial level as well as a more holistic description of pressing issues for Canadian science education

Assessment in Education Shelleyann Scott, Donald E. Scott, Charles F. Webber, 2015-10-20 This book provides key insights into how educational leaders can successfully navigate the turbulence of political debate surrounding leading student assessment and professionalised practice Given the highly politicised nature of assessment it addresses leaders and aspiring leaders who are open to being challenged willing to explore controversy and capable of engaging in informed critical discourse The book presents the macro concepts that these audiences must have to guide optimal assessment policy and practice Collectively the chapters highlight important assessment purposes and models including intended and unintended effects of assessment in a globalised context The book provides opportunities to explore cultural similarities and particularities It invites readers to challenge taken for granted assumptions about ourselves and colleagues in other settings The chapters highlight the cultural clashes that may occur when cross cultural borrowing of assessment strategies policies and tools takes place However authors also encourage sophisticated critical analyses of potential lessons that may be drawn from other contexts and systems Readers will encounter challenges from authors to deconstruct their assessment values beliefs and preconceptions Indeed one purpose of the book is to destabilise certainties about assessment that prevail and to embrace the assessment possibilities that can emerge from cognitive dissonance

Adult Intentions, Student Perceptions Kristin E.

Reimer, 2018-12-01 Restorative justice RJ is an idea whose time may have finally arrived. Although the concept has ancient roots and the term has existed in Western societies since the 1970s, only recently has it gained general public recognition. In schools, RJ's popularity is rising world-wide. In fact, education is the fastest growing area for the practice of RJ. Despite an increasing number of schools embracing the approach, it is not clear what educational RJ practitioners are trying to achieve. *Adult Intentions, Student Perceptions: How Restorative Justice is Used in Schools to Control and to Engage* focuses on the use of RJ in one school in Scotland and one in Canada. While important to understand the intentions of educators in using RJ in schools, those aims must be examined alongside the actual impact that such practices have on students. RJ can be understood and experienced in dramatically different ways by those implementing it. For some, RJ is about creating an environment of and for student engagement that challenges traditional systems of discipline and facilitates learning. For others, RJ is simply another tool for solidifying compliance and meting out punishment, albeit in a kinder, gentler way. *Adult Intentions, Student Perceptions* provides the opportunity to delve deeply into the stories of two schools and the adults and young people who inhabit them and consider the broad impact that differing educator understandings of RJ have on students. *Adult Intentions, Student Perceptions* is a timely book for RJ advocates and critics alike. It challenges a common assumption of some RJ advocates that implementing RJ necessarily creates a classroom environment of social engagement where students are empowered to engage with one another and think critically, and school relationships and hierarchies are transformed. The student experience relayed in this book shows that RJ can as readily be mobilized to create classroom environments of social control where students are taught obedience and compliance, and authority and hierarchy are reinforced. Reimer argues that RJ by itself does not guarantee certain qualities of relationship, but RJ does allow us to examine relational qualities and ask questions of how school relationships are used to engage and/or control students.

Secondary School External Examination Systems Barend Vlaardingerbroek, Neil Taylor, 2009 Summative assessment has been a contentious issue in educational circles for several decades, particularly high-stakes assessment events which arise at various junctures of the school cycle, especially those at the end of it. The French Baccalaureat and English A Levels and their numerous clones throughout the francophone and anglophone worlds are household names and represent milestone events in people's lives as their outcomes are principal determinants of young people's future prospects. These examinations are external; they are devised, conducted and processed by agencies outside the schools, usually ministerial examination units. As such, they act as blind arbiters of student achievement, providing the proverbial level playing field which ensures the comparability of outcomes. In the pyramidal school structures of yesteryear, examinations acted as filters regulating the progression of pupils to subsequent tiers of formal education. Exit points occurred from primary school level up from where unsuccessful candidates could enter the labour force and/or embark on occupationally specific further education and training. With the modernisation of the

labour market and an ever higher social demand for access to higher levels of formal education the filtering function of examinations at lower levels of schooling has been gradually eroded while burgeoning numbers of students at the upper secondary level have brought about reforms that include curricular diversification and sometimes radical overhauls of terminating assessment systems including the modification and in some instances abandonment of external examinations This edited volume brings together the experiences of twenty examination systems from around the world to show how these dynamic entities have adapted over time to the changing context of schooling Following an introduction by Stephen P Heyneman of World Bank repute there are sixteen chapters presenting Country Case Studies which have been written up under common subheadings thereby highlighting the comparative nature of the work and facilitating cross referencing The subsequent four chapters elaborate on the theme of external examinations beyond national borders including a contribution by the International Baccalaureate Organisation A defining feature of the work is the attention it pays to what it calls the nuts and bolts of external examinations from question setting to grading procedures These are it is argued instrumental in nurturing and maintaining public confidence in external examinations The book will be of immense value to people involved in educational policy studies especially strategic educational planning as well as those directly concerned with formal assessment The work has been written to appeal to a wide audience of informed persons it is accessible to teachers and interested laypeople as well as to academics

Religion and Sexuality Pamela Dickey Young, Heather Shipley, Tracy J. Trothen, 2015-01-31 The relationship between religion and sexuality is often framed as inherently conflictual Religious groups and ideologies have long influenced the public regulation of sexuality and recent controversies include religious opposition to same sex marriage sex education in schools and non traditional expressions of sexual identity But what actually happens when religion and sexuality converge in contemporary contexts Religion and Sexuality challenges the commonly held assumption that religion s relationship to sexuality is solely bound up with regulation In this provocative examination of both sexual and religious diversity chapters go beyond the familiar debates over tolerance and accommodation to explore the ways in which various forms of religious affiliation and sexual identity do in fact co exist Drawing on interviews and analyzing media representations legislation and public discourse on topics such as education economics and same sex marriage in North America and the United Kingdom this volume foregrounds the complexity and multiplicity of religious and sexual identities and practices
