

sweeping the entire Europe. It took the remedies of errors made by the armies to protect America. The nation had to get involved in the French war.

Marshall asserts that he had to stand out and persuade the reigning authority on the need to establish an everlasting defense policy in the nation. He perceived this as to save the nation of its myriad wealth which was going waste. With Hitler forging several wars with the American nation, the Great Britain had to stand in between them. But one nation has since pushed America to settle for an internal peace and protection. Considering that it is one of the stronger nations, it is concerned with assigning peace to the entire nations of the world. In this case, we see America standing out as one of the forces of peace during the Truman times. Therefore, according to the author, a nation as the US has all the capacity to prepare for and against war.

Technology and war

As evidenced during the Truman times, international war is mostly won with skillful utilization of military machines. This is reflective with the American soldiers during this time. According to the author, men are needed in war same to technology. For instance, the American success in air and sea fights centrally dwelt on technology. Apart from relying on me alone, the author emphasizes that technology is quite subtle to any success in the modern warfare. Moreover, technology is quite contributory to the entire success of national economy. Men are needed as much as technology is important.

The farewell address of 1961

This was a farewell that warned the US on the impending military industrial complex. President Eisenhower takes time to assert on the possible threats the nation was facing as a result of successes seen in the 50s. America as a nation had gone through rigorous period of warfare. According to Eisenhower, many Americans had not understood the real threats posed by the nation's unpreparedness for any war of modern age. However, he thanks the American individuals for standing strong during the past time. He singles out the spirit and power of statesmanship that could transform the nation into a scientific technological elite. With this, the author perceives tranquility, free governance, integrity and dignity among the American citizens. He urged the nation to always be on a verge of striving for high and more that would sustain the nation's future needs (Pogue 213).

As in the case of the previous author, Eisenhower urges military strength and establishment as critical to the nation's survival in the case of dubious attacks. He orchestrated all efforts to future developments that could save the nation's future plans and generations as far as peace is concerned. Furthermore, he echoes that the present state of peace and worthiness cannot be guaranteed tomorrow not unless vivid plans are laid out to cater for the future generations. In his remarks, he declares the importance of achieving the need of avoiding war.

Linguistics and Textual History Percy van Keulen,Willem Th. van Peursen,2018-07-17 Over the years the use of computers for research has become increasingly important in Biblical Studies However a combination of computational linguistics with diachronic text critical and text historical approaches has hardly ever taken place Quite often there is mutual misunderstanding between computational linguistics and more traditional approaches in the field of linguistics and textual analysis For example in computer assisted research of modern text corpora it is common to treat the text as an unequivocal and unidimensional sequence of characters In Biblical Studies however either text is considered an abstraction the result of a scholarly reconstruction based on the extant textual witnesses Here a fundamental difference in approach reveals itself The present volume tries to overcome the misunderstanding between the various disciplines and to establish how a fruitful interaction of information technology linguistics and textual criticism can contribute to the analysis of ancient texts It addresses questions concerning the confrontation between synchronic and diachronic approaches the role of linguistic analysis in the interpretation of texts and the interaction of linguistic theory and the analysis of linguistic data The first section of this volume contains the papers presented at the CALAP seminar 2003 In the second section different aspects of the interdisciplinary analysis are applied to a selected passage from the Peshitta of Kings The Historian's Toolbox Robert C. Williams,2011-12-21 Written in an engaging and entertaining style this widely used how to guide introduces readers to the theory craft and methods of history and provides a series of tools to help them research and understand the past Part I is a stimulating philosophical introduction to the key elements of history evidence narrative and judgment that explores how the study and concepts of history have evolved over the centuries Part II guides readers through the workshop of history Unlocking the historian s toolbox the chapters here describe the tricks of the trade with concrete examples of how to do history The tools include documents primary and secondary sources maps arguments bibliographies chronologies and many others This section also covers professional ethics and controversial issues such as plagiarism historical hoaxes and

conspiracy theories Part III addresses the relevance of the study of history in today's fast paced world The chapters here will resonate with a new generation of readers on everyday history oral history material culture public history event analysis and historical research on the Internet This Part also includes two new chapters for this edition GIS and CSI examines the use of geographic information systems and the science of forensics in discovering and seeing the patterns of the past Too Much Information treats the issue of information overload glut fatigue and anxiety while giving the reader meaningful signals that can benefit the study and craft of history A new epilogue for this edition argues for the persistence of history as a useful and critically important way to understand the world despite the information deluge
