Heckman, John Eric Humphries, Tim Kautz, 2014-01-14 Achievement tests play an important role in modern societies They are used to evaluate schools to assign students to tracks within schools and to identify weaknesses in student knowledge The GED is an achievement test used to grant the status of high school graduate to anyone who passes it GED recipients currently account for 12 percent of all high school credentials issued each year in the United States But do achievement tests predict success in life The Myth of Achievement Tests shows that achievement tests like the GED fail to measure important life skills James J Heckman John Eric Humphries Tim Kautz and a group of scholars offer an in depth exploration of how the GED came to be used throughout the United States and why our reliance on it is dangerous Drawing on decades of research the authors show that while GED recipients score as well on achievement tests as high school graduates who do not enroll in college high school graduates vastly outperform GED recipients in terms of their earnings employment opportunities educational attainment and health The authors show that the differences in success between GED recipients and high school graduates are driven by character skills Achievement tests like the GED do not adequately capture character skills like conscientiousness perseverance sociability and curiosity These skills are important in predicting a variety of life outcomes They can be measured and they can be taught Using the GED as a case study the authors explore what achievement tests miss and show the dangers of an educational system based on them They call for a return to an emphasis on character in our schools our systems of accountability and our national dialogue Contributors Eric Grodsky

The Smart Society Peter Salins, 2014-02-11 The Smart Society offers a detailed blueprint for how the United States can recast its human capital policies to make all Americans not just a privileged elite smarter and more successful than ever before at the same time stemming the size and cost of the nation s safety net The spectacular centuries long success of the United States is based on its having determined early on to be a smart country single mindedly developing institutions and practices that enabled its native born citizens to maximize their economic and social potential and welcoming opportunity seeking foreigners to join them Over the last four decades however the vaunted United States human capital machine has been breaking down dimming the economic and social prospects of millions of Americans If The Smart Society blueprint is followed these trends can be reversed and the nation and its people can quickly regain their preeminence in the hyper competitive and globalized world of the 21st century This is a most topical issue today because the country s current heated political disagreements are not just about the proper size of government but about how the United States can reverse its apparent decline and restore its historic economic and social vigor in other words regain its place as the world s smartest nation
