Disclosing a Value System in a Living Will Could be in Your Best Interests Susan Farrall, 2011-07-12 This book raises the question of whether the values or value system of a competent person when they have been disclosed in a living will could play a role in medical treatment decision making processes under the Mental Capacity Act 2005 The investigation seeks to address a contemporary issue in medical law that directly or indirectly affects many members of society It arises out of the fact that medical scientific and technological advances are helping people to live for longer This is consistent with the medical purpose which is to preserve the life health and well being of patients However medical advances that contribute to people living longer have precipitated a proportionate rise in diseases such as dementia Likewise medical innovations that enable physicians to artificially preserve and maintain life ensure that fewer people die following serious injury or illness but will inevitably preserve the life of some where mental functioning is unduly compromised Whether through injury or disease patients who suffer a permanent loss of decision making capacity will be incapable of exercising autonomy to safeguard their own body life and life plan As a result provisions of the MCA governing who decides and the principles on which they should decide how best to act are set to become increasingly relevant to many more people On that basis the author examines the ethical underpinnings of the law to show why autonomy not medical beneficence has succeeded in becoming the primary principle of medical law in respect of the capable patient Next the author investigates whether principles that are relevant to capable patients inform the law related to mentally incapacitated patients also Accordingly this study is ultimately concerned

with the circumstances under which the Mental Capacity Act 2005 authorises the administration of a medical treatment in respect of formerly competent patients shows why the law might fail to deliver what it promises in respect of this patient group and suggests ways for how the law might be made to work better This research is timely and could benefit many people The range of issues covered in this book will appeal to a wide readership including medical ethics and law students and tutors medical and legal professionals and interested members of the public

An Introductory Guide to EC Competition Law and Practice Valentine Korah,1994 **Devolution, Law Making and the Constitution** Robert Hazell,Richard Rawlings,2015-12-01 Law making is a primary function of government and how well the three devolved UK legislatures exercise this function will be a crucial test of the whole devolution project This book provides the first systematic study and authoritative data to start that assessment It represents the fruits of a four year collaboration between top constitutional lawyers from Scotland Wales and Northern Ireland and leading researchers in UCL s Constitution Unit The book opens with detailed studies of law making in the period 1999 2004 in the Scottish Parliament and the Assemblies in Wales and Northern Ireland and how they interact with Westminster Later contributions look at aspects of legislative partnership in the light of the UK s strongly asymmetric devolutionary development and also explain the unexpected impact of devolution on the courts Individual chapters focus on various constitutional aspects of law making examining the interplay of continuity and change in political legal and administrative practice and the competing pressures for convergence and divergence between the different parliaments and assemblies This book is essential reading for academics and students in law and in politics and for anyone interested in the constitutional and legal aspects of UK devolution not least the practitioners and policymakers in London Edinburgh Cardiff and Belfast
