Alkaline Phosphatase Robert B. McComb, George N. Bowers, Jr., Solomon Posen, 2013-11-11 There can be no doubt that alkaline phosphatase is one of the most extensively investigated of all enzymes This has resulted from the ubiquity of its distribution and from the ease and sensitivity with which its activity can be measured Unfortunately these wide ranging but often superficial experimental studies have been followed up by intensive and systematic investigations in only a few limited areas of the biochemistry and chemical pathology of alkaline phosphatase The result has been the accumulation of a scientific literature of intimidating proportions and the inevitable rediscovery of already known facts about the enzyme Scientists are taught early in their careers that in the words of Sir John Herschel Hasty generalization is the bane of science Nevertheless moments arrive in all spheres of scientific activity when generalization becomes essential to codify and to select from the mass of data already accumulated and to provide starting points for new developments and new lines of investigation This is especially true in a field such as alkaline phosphatase research in which very real dangers exist that the seeds of fundamental understanding will be lost amidst an unexamined harvest of empirical observations The history of the study of alkaline phosphatase provides several instances when valuable generalizations have emerged Occasionally the conclusions drawn on the basis of available evidence were wrong more frequently they have stood the test of further experimentation and always they have provided new insights into the nature and proper ties of this enzyme

Enabling Flexibility in Process-Aware Information Systems Manfred Reichert, Barbara Weber, 2012-08-28 In today's dynamic business world the success of a company increasingly depends on its ability to react to changes in its environment in a quick and flexible way Companies have therefore identified process agility as a competitive advantage to address business trends like increasing product and service variability or faster time to market and to ensure business IT alignment Along this trend a new generation of information systems has emerged so called process aware information systems PAIS like workflow management systems case handling tools and service orchestration engines With this book Reichert and Weber address these flexibility needs and provide an overview of PAIS with a strong focus on methods and technologies fostering flexibility for all phases of the process lifecycle i.e. modeling configuration execution and evolution Their presentation is divided into six parts Part I starts with an introduction of fundamental PAIS concepts and establishes the context of process flexibility in the light of practical scenarios Part II focuses on flexibility support for pre

specified processes the currently predominant paradigm in the field of business process management BPM Part III details flexibility support for loosely specified processes which only partially specify the process model at build time while decisions regarding the exact specification of certain model parts are deferred to the run time Part IV deals with user and data driven processes which aim at a tight integration of processes and data and hence enable an increased flexibility compared to traditional PAIS Part V introduces existing technologies and systems for the realization of a flexible PAIS Finally Part VI summarizes the main ideas of this book and gives an outlook on advanced flexibility issues The book s target groups include researchers PhD students and Master students in the field of information systems After reading the book they will better understand PAIS flexibility aspects To support the easy use as a textbook a series of exercises is provided at the end of each chapter and slides and further teaching material are available on the book s web site www.flexibleprocesses.com Professionals specializing in business process management BPM who want to obtain a good understanding of flexibility challenges in BPM and state of the art solutions will also benefit from the presentations of open source as well as commercial process management systems and related practical scenarios
