**New Lenses on Intellectual Disabilities** Jennifer Clegg, 2020-05-21 This book gathers together recent international research in intellectual disability ID examining the diverse modes of existence that characterise living with intellectual disabilities in the 21st century Ranging from people with no speech and little mobility who need 24 hour care to people who marry or hold down jobs this book moves beyond the typical person with ID imagined by public policy healthy with mild ID and a supportive family and living in a welcoming community The book is divided into three sections The first A richer picture of people and relationships expands our understanding of different people and lifestyles associated with ID The second section Where current policies fall short finds that Supported Living provides just as mediocre a form of care as group homes and concludes that services for people with challenging behaviour are unrelated to need The contributors research identifies no effective employment support strategies as well as technological and legal changes that prevent organisations from employing people with ID With nearly a quarter of this population in poor health the contributors reflect on whether social model approaches should be allowed to trump medical considerations The third section New thinking about well being reveals that being old poor and living alone increases health risk and that medication administration is significantly more complex for people with ID Moving beyond 20th century certainties surrounding
