The IMLI Manual on International Maritime Law David Joseph Attard, Malgosia Fitzmaurice, Norman Martinez, Riyaz Hamza, 2016-03-24. This three volume Manual on International Maritime Law presents a systematic analysis of the history and contemporary development of international maritime law by leading contributors from across the world. Prepared in cooperation with the International Maritime Law Institute, the International Maritime Organization's research and training institute, this is a uniquely comprehensive study of this fundamental area of international law. Volume III is devoted to the marine environmental law and maritime security law. The first part of Volume III deals in depth with issues of most fundamental importance in the contemporary world, namely how to protect the marine environment from pollution from ships, land based sources, seabed activities and from or through air. In explaining these types of pollution, various conventions concluded under the auspices of the IMO such as MARPOL 73/78 and the 1972 London Convention and soft law documents are analysed. The volume also includes chapters on the conventions relating to pollution incident preparedness, response, cooperation and the relevance of regional cooperation. It additionally discusses liability and compensation for pollution damage. The second part of volume III examines an issue of increasing importance in a world threatened by terrorism, piracy and drug trafficking. Chapters in this part cover the topics of piracy, stowaways, human trafficking, illicit drugs, terrorism, military uses of the sea and new maritime security threats such as the illegal dumping of hazardous wastes and toxic substances as well as illegal, unreported and unregulated fishing. Real Estate Record and Builders' Guide, 1889.

Wicked Valuations Michael McDermott, 2018-07-16. Traditional valuation approaches are increasingly recognised as being insufficient to address the wicked valuation problems of the diverse peoples and groups that inhabit the globe from north to south, east to west. This book demonstrates the limitations of science and, in particular, economics as the foundation on which valuations are traditionally based. It demonstrates the importance of and provides justification for the personal, cultural values and norms which underpin our assessment of value and the fact that these vary across the world. In *Wicked Valuations*, Michael McDermott develops a means of engaging with highly complex valuation problems. His autoethnography provides a lens to draw on knowledge and experience from his 40 years in land valuation in Africa and the Asia Pacific, while documentary analysis is used to draw in the views of other valuation practitioners and scholars who are becoming increasingly aware of the need to develop ways to adapt land valuation processes to the complexity of our contemporary

landscapes
