influence the norms that both parties refer to in conflicts Which party is able to enforce its own norms or to act contrary to norms on which both parties agree and which factors influences the balance of power Using a grounded theory methodology involving extensive field research and revealing interviews of workers employers employment agencies human rights organizations and governmental officials Vlieger exposes the multifacets and dilemmas of the people and institutions involved Finally she proposes pragmatic solutions to prevent the most excessive vulnerabilities and imbalances This is an upsetting and candid introduction to another world supported with scholarly research but accessible to the general reader as well as academics and human rights activists Part of the Human Rights and Culture Series from Quid Pro Books **Monthly**
