Michael A. Hunzeker, 2021-07-15 In *Dying to Learn*, Michael Hunzeker develops a novel theory to explain how wartime militaries learn. He focuses on the Western Front, which witnessed three great power armies struggle to cope with deadlock throughout the First World War, as the British, French, and German armies all pursued the same solutions: assault tactics, combined arms, and elastic defense in depth. By the end of the war, only the German army managed to develop and implement a set of revolutionary offensive, defensive, and combined arms doctrines that, in hindsight, represented the best way to fight. Hunzeker identifies three organizational variables that determine how fighting militaries generate new ideas, distinguish good ones from bad ones, and implement the best of them across the entire organization. These factors are the degree to which leadership delegates authority on the battlefield, how effectively the organization retains control over soldier and officer training, and whether or not the military possesses an independent doctrinal assessment mechanism. Through careful study of the British, French, and German experiences in the First World War, *Dying to Learn* provides a model that shows how a resolute focus on analysis, command, and training can help prepare modern militaries for adapting amidst high-intensity warfare in an age of revolutionary technological change. **Marketing Information Guide**, 1969 *Innovation*

Fantastic Cinema Subject Guide Bryan Senn, 2024-10-16 About 2,500 genre films are entered under more than 100 subject headings, ranging from abominable snowmen through dreamkillers, rats, and time travel to zombies, with a brief essay on each topic, development highlights, and trends. Each film entry shows year of release, distribution company, country of origin, director, producer, screenwriter, cinematographer, cast credits, plot synopsis, and critical commentary. **Star Worlds** William Sims Bainbridge, 2016-10-19 *Star Worlds* explores the future-oriented universe of online virtual worlds connected with popular science fiction, specifically with *Star Wars* and *Star Trek*, that have been inhabited for over a decade by computer gamers. The *Star Wars* and *Star Trek* franchises, both of which have shaped the dominant science-fiction mythologies of the last half-century, offer profound conceptions of the tension between freedom and control in human economic, political, and social interactions. William Sims Bainbridge investigates the human and technological dynamics of four online virtual worlds based on these two very different traditions: the massively multiplayer online games *Star Wars Galaxies*, *Star Wars: The Old Republic*, *Star Trek Online*, and the *Star Trek* community in the non-game user-created virtual environment *Second Life*. The four star worlds explored in this book illustrate the dilemmas concerning the role of technology as liberator or oppressor in our postindustrial society and represent computer simulations of future possibilities of human experience. Bainbridge considers the relationship between a real person and the role that person plays, the relationship of an

individual to society and the relationship of human beings to computing technology In addition to collecting ethnographic and quantitative data about the social behavior of other players he has immersed himself in each of these worlds role playing 14 avatars with different skills and goals to gain new insights into the variety of player experience from a personal perspective
