used to take years or even decades for disruptive innovations to dethrone dominant products and services But now any business can be devastated virtually overnight by something better and cheaper How can executives protect themselves and harness the power of Big Bang Disruption Just a few years ago drivers happily spent more than 200 for a GPS unit But as smartphones exploded in popularity free navigation apps exceeded the performance of stand alone devices Eighteen months after the debut of the navigation apps leading GPS manufacturers had lost 85 percent of their market value Consumer electronics and computer makers have long struggled in a world of exponential technology improvements and short product life spans But until recently hotels taxi services doctors and energy companies had little to fear from the information revolution Those days are gone forever Software based products are replacing physical goods And every service provider
