

How to Add Fractions with Different Denominators

Example #1

$$\frac{2}{3} + \frac{1}{5}$$

$$\overset{5 \times}{\frac{2}{3}} + \overset{1 \times 3}{\frac{1}{5}} = \overset{10}{\frac{10}{15}} + \overset{3}{\frac{3}{15}}$$

$$\rightarrow \frac{10+3}{15} = \frac{13}{15}$$

Example #2

$$\frac{2}{9} + \frac{3}{7}$$

$$\overset{7 \times}{\frac{2}{9}} + \overset{3 \times 9}{\frac{3}{7}} = \overset{14}{\frac{14}{63}} + \overset{27}{\frac{27}{63}}$$

$$\rightarrow \frac{14+27}{63} = \frac{41}{63}$$

Example #3

$$\frac{3}{18} + \frac{2}{16}$$

$$\overset{16 \times}{\frac{3}{18}} + \overset{2 \times 18}{\frac{2}{16}} = \overset{48}{\frac{48}{288}} + \overset{36}{\frac{36}{288}}$$

$$\rightarrow \frac{48+36}{288} = \frac{84}{288} = \frac{7}{24}$$

Ed., 2015-02-21 Welcome to The Amazing 8 Day Super Simple Scripted Guide to Teaching or Learning Fractions I have attempted to do just what the title says make learning fractions super simple I have also attempted to make it fun and even ear catching The reason for this is not that I am a frustrated stand up comic but because in my fourteen years of teaching the subject I have come to realize that my jokes even the bad ones have a crazy way of sticking in my students heads And should I use a joke even a bad one repetitively the associations become embedded in their brains many times to their chagrin What is so different about this book First of all it is scripted so that tutors parents and teachers alike can deliver the lessons easily and without frustration Secondly the scripts and lessons

have been carefully crafted to be ageless that is to apply to any learner based on age or level of mathematical mastery Finally the lessons have been carefully culled and edited over a decade in order to include the most necessary information in a finite and reasonable timetable something in this educator s opinion other books seem to lack *Daily Learning Drills, Grade 4*,2014-02-03 Daily Learning Drills provides complete daily practice for essential fourth grade skills Topics include word roots finding the main idea using pronouns multiplication and division fractions nonfiction reading world history and many more Daily Learning Drills provides complete daily practice for essential school skills Learning activities support the Common Core State Standards and cover English language arts and reading math science and social studies A review section reinforces skills for each subject area With Daily Learning Drills students will find the skills and practice they need for school success

Bringing Math Home Suzanne L. Churchman,2006-05-31 This ultimate parents guide to elementary school math features projects games and activities children and parents can do together to increase their understanding of basic math concepts Fun activities such as mapping a child's bedroom for practice in measurements or keeping a diary of numeric items like vacation mileage and expenses reinforce the math skills outlined in each lesson Using the standards issued by the National Council of Teachers of Mathematics as a foundation this book covers both content and process standards for areas such as algebra geometry measurement problem solving and reasoning proofs It also includes a glossary of math terms and dozens of suggestions for additional children's reading to further math understanding **Arithmetic Counts!** Paul Shoecraft,2025-01-24 Dr Shoecraft may be the only mathematician since the New Math in the 1960s to seriously analyze the lowly subject of arithmetic and how to teach it His breakthrough came when he experimented with teaching what needs to be understood instead of known memorized like teaching why addition problems until the algorithm they are using supposedly becomes cemented in their brains By teaching the essence of arithmetic in sensible ways and appealing to children's love of games songs and movement he's proven that virtually ALL children can learn arithmetic the foundation of algebra higher mathematics science technology and more even music When children understand arithmetic they own it It's no longer just their teacher's math It's their math America's children are being held back in math because of how arithmetic is drug out in elementary school Virtually every textbook based elementary school math program in use today is mind numbing in its repetitiveness from grade to grade The reason for the redundancy is to slow down the teaching of arithmetic so it can be memorized Research shows that the human brain is not designed to remember things learned by rote when no longer practiced That's acknowledged in the use it or lose it aphorism that states the obvious that we remember what we use and forget what we don't You know that to be true if you've ever forgotten things you once knew as well as your own name things like an old address or a license plate number Every child can understand base ten numeration when taught hands on with arithmetic blocks Thereby every child can understand base ten arithmetic And every child can learn how to count out the

number facts like 5 7 12 17 8 9 6 X 7 42 and 56 7 8 and if they forget one never have to guess and risk ridicule and bad grades if they guess wrong What matters in teaching arithmetic is not how much a child can remember but how much they can figure out if when they forget
