Geometry Honors 6 Form G Circles And Arcs:

Harmonic Analysis, Group Representations, Automorphic Forms, and Invariant Theory Jian-Shu Li, 2007 This volume carries the same title as that of an international conference held at the National University of Singapore 9-11 January 2006 on the occasion of Roger E Howe's 60th birthday. Authored by leading members of the Lie theory community, these contributions expanded from invited lectures given at the conference are a fitting tribute to the originality, depth, and influence of Howe's mathematical work. The range and diversity of the topics will appeal to a broad audience of research mathematicians and graduate students interested in symmetry and its profound applications.

Topology and Geometry in Dimension Three Weiping Li, 2011 This volume contains the proceedings of a conference held from June 4-6, 2010 at Oklahoma State University in honor of William Jaco's 70th birthday. His contributions to research in low-dimensional geometry and topology and to the American mathematical community, especially through his work for the American Mathematical Society, were recognized during the conference. The focus of the conference was on triangulations and geometric structures for three-dimensional manifolds. The papers in this volume present significant new results on these topics as well as in geometric group theory.
