Beyond Instrumentalised Politics Garrett Thomson, Scherto Gill, 2024-05-06 Political thinking tends to outline reforms to existing political institutions In contrast Beyond Instrumentalised Politics argues for the need for systemic transformation It articulates the evaluative principles for good governance and employs these principles to argue for a new political system Because persons are non instrumentally valuable good governance requires that all people are respected equally and this necessitates a participatory democracy The book investigates how such a democracy might function through consensus based decision making and argues for a redefinition of consensus It characterises the local and national institutions required for public governance thus conceived This includes the creation of

Privacy on the Ground Kenneth A. Bamberger, Deirdre K. Mulligan, 2015-10-23 An examination of corporate privacy management in the United States Germany Spain France and the United Kingdom identifying international best practices and making policy recommendations Barely a week goes by without a new privacy revelation or scandal Whether by hackers or spy agencies or social networks violations of our personal information have shaken entire industries corroded relations among nations and bred distrust between democratic governments and their citizens Polls reflect this concern and show majorities for more broader and stricter regulation to put more laws on the books But there was scant evidence of how well tighter regulation actually worked on the ground in changing corporate or government behavior until now This intensive five nation study goes inside corporations to examine how the people charged with protecting privacy actually do their work and what kinds of regulation effectively shape their behavior And the research yields a surprising result The countries with more ambiguous regulation Germany and the United States had the strongest corporate privacy management practices despite very different cultural and legal environments The more rule bound countries like France and Spain trended instead toward compliance processes not embedded privacy practices At a crucial time when Big Data and the Internet of Things are snowballing *Privacy on the Ground* helpfully searches out the best practices by corporations provides guidance to policymakers and offers important lessons for everyone concerned with privacy now and in the future **Sustainable**
