 Locke,2023-11-08 This book charts the journey of British General Practitioners GPs towards professional self realisation
 through the development of a political consciousness manifested in a series of bruising encounters with government GPs are
 an essential part of the social fabric of modern Britain but as a group have always felt undervalued clashing with successive
 governments over the terms on which they offered their services to the public Explaining the background to these disputes
 and the motives of GPs from a sociological perspective this research casts new light on some defining moments in the
 creation of the modern British state from National Health Insurance to the National Health Service and the history of the
 British medical profession It examines these events from the point of view of the professionals intimately involved in and
 affected by them using both established sources like Ministry of Health records an in depth analysis of rarely studied records
 of professional bodies and previously unresearched archive material The result is a fascinating account of conflict and
 cooperation and of heroic and less than heroic defiance of political authority involving interactions between complex
 personalities and competing ideologies Scholarly yet readable this book will be of interest to the general reader as much as
