The Search for Entrepreneurship Simon Bridge,2016-12-08 Since the 1980s governments have often sought to encourage entrepreneurship on the assumption that it creates small businesses as the primary drivers of job creation As a result entrepreneurship has become a valid subject for academic research attracting extensive funding Despite this explosion of scholarship there is no accepted model of how entrepreneurship operates or even a commonly accepted definition of what it is Simon Bridge posits that this is because entrepreneurship has been studied based on the false assumption that it exists as a specific discrete identifiable phenomenon operating in accordance with consistent predictable rules So this misdirected search has produced more questions than answers Accepting that entrepreneurship as we have conceived it does not exist could lead to new and valuable insights into what the different forms of entrepreneurship are and how they might be influenced Scholars advanced students and policy makers will find this a thought provoking insight into the misconceptions of entrepreneurship Digital Heritage Marinos Ioannides,Nadia Magnenat-Thalmann,Eleanor Fink,Roko Zarnic,Alex-Yianing Yen,Ewald Quak,2014-11-12 This book constitutes the refereed proceedings of the 5th International Conference on Digital Heritage EuroMed 2014 held in Limassol Cyprus in November 2014 The 84 full and 51 short papers presented were carefully reviewed and selected from 438 submissions They focus on the interdisciplinary and multi disciplinary research concerning cutting edge cultural heritage informatics physics chemistry and engineering and the use of technology for the representation documentation archiving protection preservation and communication of Cultural Heritage knowledge **Social Informatics** Luca Maria Aiello,Daniel McFarland,2015-02-27 This book constitutes the proceedings of the Workshops held at the International Conference on Social Informatics SocInfo 2014 which took place in Barcelona Spain in November 2014 This year SocInfo 2014 included nine satellite workshops the City Labs Workshop the Workshop on Criminal Network Analysis and Mining CRIMENET the Workshop on Interaction and Exchange in Social Media DYAD the Workshop on Exploration of Games and Gamers EGG the Workshop on HistoInformatics the Workshop on Socio Economic

Advances in Accounting Education Timothy J. Rupert, Beth B. Kern, 2016-01-11 Advances in Accounting Education Teaching and Curriculum Innovations publishes both non empirical and empirical articles dealing with accounting pedagogy All articles explain how teaching methods or curricula programs can be improved *Iran, Israel, and the United States* Ofira Seliktar, Farhad Rezaei, 2018-06-20 This book analyzes the process of evaluating Iran's nuclear project and the efforts to roll it back resulting in the 2015 nuclear agreement known as the Joint Comprehensive Plan of Action JCPOA Despite its aura of scientific exactitude nuclear intelligence is complex and susceptible to methodological disagreements and political bias at the international oversight level the International Atomic Energy Agency IAEA and within the countries involved in the rollback project Israel and the United States To highlight both the technological problems of assessing compliance and the politicization each chapter in the book uses a real time comparison of the nuclear developments in Iran and the perception of Israel and the United States This methodology yielded some significant results Essentially two camps had formed in each country those who were pushing for an agreement with Iran and those who opposed it The Israeli intelligence agencies the Mossad and the Military Intelligence as well as the highly secretive Israeli Atomic Energy Commission IAEC which advised them considered the program to be weak and slow moving The right wing government of Benjamin Netanyahu suggested that Iran was steps away from the point of no return making it an existential threat to Israel A virtually identical split emerged in Washington While the intelligence community and the advising scientists from the National Nuclear Laboratories considered Iran progress to be relatively modest the Republicans and the Israel lobby the Jewish organizations and the Christian Zionists warned of the imminent danger of a nuclear Iran With the Obama administration pushing for the JCPOA a fierce debate took place in Congress The Israeli intelligence and military chiefs led by the Mossad chief Meir Dagan which had previously blocked Netanyahu from a preemptive action quietly supported the agreement In Washington the Israel lobby and the Republicans helped by Netanyahu mounted an all out effort to defeat the deal in Congress The pro deal coalition fought back by mobilizing the scientific community military and intelligence officials the business lobby and grassroots Democrats The JCPOA represents the first successful effort of peaceful counterproliferation At the same excessive politicization has clouded its legitimacy and cast doubt about its future **Independent Thinking on Loss** Ian

Gilbert, 2020-03-09 Written from the personal experience of a parent and his three children Independent Thinking on Loss A little book about bereavement for schools details the ways in which schools can help their pupils come to terms with the death of a parent A child loses a parent every twenty two minutes in the UK Childhood bereavement brings with it a whole series of challenges for the children involved challenges they will deal with all their lives The research shows teachers want to help but don't know what to do This book is a start Written by Independent Thinking founder Ian Gilbert together with his

three children Independent Thinking on Loss is a personal account of the way educational institutions tried and succeeded tried and failed and sometimes didn't try at all to help William Olivia and Phoebe come to terms with the death of their mother Several months after their mother's death BBC's Newsround aired a brave and still controversial programme in which four children talked about their losses This prompted Ian and his children to sit down and think about their own experiences and draw up a fifteen strong list of dos and don'ts that could help steer schools towards a better understanding of what is needed from them at such a difficult time The warmth of reception of this handout led the family to expand their advice and suggestions into what has now become Independent Thinking on Loss the proceeds of which will go to Winston's Wish one of the UK's leading children's bereavement charities Ian William Olivia and Phoebe encourage educators to view death and bereavement as something that can be acknowledged and talked about in school and offer clear guidelines that will make a difference as to how a school can support a bereaved child in their midst They also explore how conversations and actions little ones whole school ones genuine ones professional ones personal ones in the school setting can make an awful scenario just that little bit easier for children to deal with Suitable for anyone working with children and young people in an educational setting Independent Thinking on Loss is an updated edition of The Little Book of Bereavement for Schools ISBN 9781845904647 and is one of a number of books in the Independent Thinking On series from the award winning Independent Thinking Press

Technology, Media Literacy, and the Human Subject Richard S. Lewis, 2021-06-03 Media literacy is often focused on evaluating the message rather than reflecting on the medium Bringing together postphenomenology media ecology posthumanism and complexity theory Richard Lewis s book offers a method for such a reflection and shows how our everyday media environments constitute us as post human subjects one that is becoming and constitutes through relations also with our media technologies An original interdisciplinary effort including for example the term intrasubjective mediation and a must read book for everyone interested in how we become with and through technologies Prof Mark Coeckelbergh University of Vienna Technology Media Literacy and the Human Subject is a clearly and concisely written book that employs a fruitful transdisciplinary approach It at once offers an excellent grounding in the literature whilst simultaneously developing a useful tool for students to reflect deeply and critically upon their own engagement with media Thoroughly recommended Alexander Thomas University of East London What does it mean to be media literate in today s world How are we transformed by the many media infrastructures around us We are immersed in a world mediated by information and communication technologies ICTs From hardware like smartphones smartwatches and home assistants to software like Facebook Instagram Twitter and Snapchat our lives have become a complex interconnected network of relations Scholarship on media literacy has tended to focus on developing the skills to access analyze evaluate and create media messages without considering or weighing the impact of the technological medium how it enables and constrains both messages and media users Additionally there is often little attention paid to the broader context of interrelations which affect our engagement with media technologies This book addresses these issues by providing a transdisciplinary method that allows for both practical and theoretical analyses of media investigations Informed by postphenomenology media ecology philosophical posthumanism and complexity theory the

author proposes both a framework and a pragmatic instrument for understanding the multiplicity of relations that all contribute to how we affect and are affected by our relations with media technology The author argues persuasively that the increased awareness provided by this posthuman approach affords us a greater chance for reclaiming some of our agency and provides a sound foundation upon which we can then judge our media relations This book will be an indispensable tool for educators in media literacy and media studies as well as academics in philosophy of technology media and communication studies and the post humanities

Controlling Cyberspace Carol M. Glen,2017-12-07 Informed by theories of international relations this book assesses global political conflicts over cyberspace It also analyzes the unique governance challenges that the Internet presents both in terms of technical problems and control over content The internet is a resource of unparalleled importance to all countries and societies but the current decentralized system of Internet governance is being challenged by governments that seek to assert sovereign control over the technology The political battles over governing the Internet ones that are coming and conflicts that have already started have far reaching implications This book analyzes the shifting nature of internet governance as it affects timely and significant issues including internet freedom privacy and security as well as individual and corporate rights Controlling Cyberspace covers a broad range of issues related to internet governance presenting a technical description of how the internet works an overview of the internet governance ecosystem from its earliest days to the present an examination of the roles of the United Nations and other international and regional organizations in internet governance and a discussion of internet governance in relation to specific national and international policies and debates Readers will consider if internet access is a human right and if the right to freedom of expression applies equally to the exchange of information online The book also addresses how the digital divide between those in developed countries and the approximately 5 billion people who do not have access to the internet affects the issue of internet governance and it identifies the challenges involved in protecting online privacy in light of government and corporate control of information
