Understanding Korean Americans' Mental Health Sung Seek Moon, Haein Son, Anderson Sungmin Yoon, 2021-07-12. The Korean American community is one of the major Asian ethnic subgroups in the United States. Though considered among one of the model minority groups excelling academically and professionally, members in this community are plagued by unaddressed mental health obstacles. In *Understanding Korean Americans Mental Health: A Guide to Culturally Competent Practices, Program Developments, and Policies*, the editors Anderson Sungmin Yoon, Sung Seek Moon, and Haein Son examine a variety of mental health issues in the Korean American community, including depression, suicide, substance abuse, and trauma, and convincingly connect these challenges to cultural stigma and racial prejudice. The editors argue that this population and its mental health needs are neglected by current approaches in mainstream mental health services. Alarming, the very cultural values that help make up the Korean American community are contributing to its members' reluctance to seek care, counting both familial and communal shame among the most pressing culprits. This book supports these claims with statistical realities and seeks to gather the relatively scarce research that does exist on this topic to underscore the heightened prevalence of mental health issues among Korean Americans, and the contributors make recommendations for more culturally competent practices, program developments, and policies.

Innovations and Challenges in Identity Research David Block, 2021-12-20. *Innovations and Challenges in Identity Research* examines established and emergent issues within identity research. This innovative book adopts a disciplinary transcendent approach, drawing on a range of social science, humanities, and human science disciplines on the way to a detailed consideration of the history of identity as a construct, the components of a poststructuralist social constructivist approach to identity, the prospect of a Marxist political economy approach to identity, the interrelationship between structure and agency, and a model of structuring spheres, an expanded version of positioning theory, the digital universe as the future of identity research. Leading researcher David Block provides a personal take on this key topic of study in applied linguistics and explains why and how discourse analysis is still a useful means through which we can understand identity today. The book is essential reading for students and academics studying and researching within the area of language and identity.

A Glossary of Old Syrian Joaquín Sanmartín, 2024-06-05. *A Glossary of Old Syrian* is the first of two volumes aimed at the completion of a lexicographical index of the Old Syrian linguistic continuum. This glossary gives a picture or map of the Old Syrian lexicon as it can be extracted and reconstructed from the available sources from the Old Akkadian, Eblaitic, through the Old and Middle Babylonian corpora. Old Syrian can be defined most appropriately as a diachronically conservative

geographically pluricentric and pragmatically multilayered linguistic cluster Therefore the present work pays special attention to the distribution of lexical data along diatopic and diastratic criteria In view of the enormous amount of material and the dispersion of the data this glossary focuses on the most representative textual corpora of the Old Syrian linguistic landscape The bibliographical references are kept deliberately succinct and as a rule restricted to the classic works that may be easily found in every Assyriological or Semitic library public or private and that will redirect the users to their sources Since the Old Syrian lexicography remains uncertain the leading interpretative opinions are included alongside the most relevant comparative Semitic material A Glossary of Old Syrian offers a clear picture of the current state of this field and is intended to serve as a reference work in support of future study

19th century is preserved on several large cuneiform manuscripts from the royal library of Ashurbanipal from the 7th century BC. The longest surviving ancient work on diseased eyes, the text predates by several centuries corresponding Hippocratic treatises. The Nineveh series represents a systematic array of eye symptoms and therapies, also showing commonalities with Egyptian and Greco-Roman medicine.
