**Green Outcomes in the Real World** Peter McManners, 2016-04-15 Over the last three decades, the world economy has grown strongly on the back of globalization supported by the policies of free trade, open markets, and privatisation. Support has also grown for the concept of sustainability, meeting the needs of the present without compromising the ability of future generations to meet their own needs. But as the Earth's systems come under increasing strain, the inherent conflict between sustainability and globalization has been exposed. *Green Outcomes in a Real World* examines the shift in thinking required to reconcile these two important areas of policy. In this ground-breaking book, Peter McManners has coined the term Proximization to define a new policy framework. The principles of Proximization are sustainability, subsidiarity, primacy of the state, and market economics, and the application of these familiar concepts towards a sustainable globalised world is novel and different. The author argues that

adherence to the principles of proximization will return world society to a stable natural order and will mean changes Global commodity flows will reduce and barriers to migration will increase National governments will demand more control over their finances leading to restrictions on capital flows Indeed Peter believes that an element of selfish determination is needed The new world order will be sustainable by design Global organisations such as the UN national governments and global corporations will have to understand and apply a different paradigm The arguments in this book do not reflect the idealism or even naivety of some of the green movement This book is about hard edged reality presented by an author with huge experience and a deep understanding of the business perspective It will appeal to a wide range of professionals involved in setting policy and future direction for businesses governments and non governmental bodies as well as to those with an academic interest in business economics social and environmental issues and public policy *Manias, Panics, and Crashes*

Robert Z. Aliber, Charles P. Kindleberger, Robert N. McCauley, 2023-03-06 In the Eighth Edition of this classic text on the financial history of bubbles and crashes Robert McCauley joins with Robert Aliber in building on Charles Kindleberger's renowned work McCauley draws on his central banking experience to introduce new chapters on cryptocurrency and the United States as the 21st Century global lender of last resort He also updates the book's coverage of the recent property bubble in China as well as providing new perspectives on the US housing bubble of 2003 2006 and the Japanese bubble of the late 1980s And he gives new attention to the social psychology that leads people to take the risk of investing in Ponzi schemes and asset price bubbles For the first time in this revised and updated edition figures highlight key points to ensure that today's generation of finance and economic researchers students practitioners and policy makers as well as investors looking to avoid crashes have access to this panoramic history of financial crisis **Estimating Impact** Alexander

simulation is adequate for testing a policy's effects with existing societal structures For example NNL is a cognitive agent model based on the REPAST Symphony toolkit Diverse Issues in Higher Education, 2006 **Southern-Led**

**Development Finance** Diana Barrowclough, Kevin P. Gallagher, Richard Kozul-Wright, 2020-09-29 Southern Led Development Finance examines some of the innovative new south south financial arrangements and institutions that have emerged in recent years as countries from the Global South seek to transform their economies and to shield themselves from global economic turbulence Even before the Covid 19 crisis it was clear to many that the global economy needed a reset and a massive increase in public investment In the last decade southern owned development banks infrastructure funds foreign exchange reserve funds and Sovereign Wealth Funds have doubled the amount of long term finance available to developing countries Now as the world considers what a post Covid 19 future will look like it is clear that Southern led institutions will do much of the heavy lifting This book brings together insights from theory and practice incorporating the voices of bankers policymakers and practitioners alongside international academics It covers the most significant new initiatives stemming from Asia tried and tested examples in Latin America and in Africa and the contribution of advanced economies Whilst the book highlights the potential for Southern led initiatives to change the global financial landscape profoundly it also shows their varied impacts and concludes that more is needed for development than just the technical availability of funds As governments and businesses become frustrated by the traditional North dominated mechanisms and international financial system this book argues that southern led development finance will play an important role in the search for more inclusive equitable and sustainable patterns of investment trade and growth in the post Covid landscape It will be of interest to practitioners policy makers researchers and students working on development and finance everywhere **The Asia Pacific**
