

KeyMath Revised/Normative Update

Keymath Revised/Normative Update (Keymath-R/NU)

A. J. Connolly (1998)

Type: Norm-referenced and domain-referenced test

Major Content Areas: Basic concepts, operations, and applications in mathematics

Type of Administration: Individual

Administration Time: 30 to 50 minutes

Age/Grade Levels: Grades K-9, ages 5-0 through 22-11

Types of Scores: Standard score and percentile ranks for subtests, area scores, and total test; optional age and grade equivalents for area scores and total test

Computer Aids: *KeyMath-R/NU ASSIST*

Typical Uses: A broad-based mathematics test for the identification of strengths and weaknesses in mathematics skill development

Cautions: Reliability of the *KeyMath-R/NU* is best for total test and area scores; further information is needed about concurrent validity. In administration, the Numeration Basal Item determines starting points for later subtests. Scoring is straightforward but hand scoring can be time-consuming if all types of results are desired.

Settings Jerry J. Sweet, Ronald H. Rozensky, Steven M. Tavian, 1991-04-30 For two decades I have been responding to questions about the nature of health psychology and how it differs from medical psychology behavioral medicine and clinical psychology From the beginning I have taken the position that any application of psychological theory or practice to problems

and issues of the health system is health psychology I have repeatedly used an analogy to Newell and Simon's General Problem Solver program of the late 1950s and early 1960s which had two major functional parts in addition to the executive component One was the problem solving core the procedural competence the other was the representation of the problem environment In the analogy the concepts knowledge and techniques of psychology constitute the core competence the health system in all its complexity is the problem environment A health psychologist is one whose basic competence in psychology is augmented by a working knowledge of some aspect of the health system Quite apparently there are functionally distinct aspects of health psychology to the degree that there are meaningful subdivisions in psychological competence and significantly different microenvironments within the health system I hesitate to refer to them as areas of specialization as the man who gave health psychology its formal definition Joseph Matarazzo has said that there are no specialties in psychology cited in the editors preface to this book Resources in Education, 1998
