ABOUT THIS MANUAL

The **Infobulb** and **QuickFlash** should be read **BEFORE** this Manual. The **QuickFlash** refers to pages in this Manual.

This Manual:

- describes the software in full; it explains how to deliver speeches, create tunes, configure the Lightwriter® for special needs and so on.
- describes the Lightwriter® hardware in general terms - see the **QuickFlash** supplied with your Lightwriter® for details about your model.
- is designed for reference, **NOT** for everyday use.
- applies to all the models mentioned above.
- does not apply to models SL5 or SL55.
- applies to earlier V5 software-versions, with minor differences.

This Manual provides full details for advanced users and therapists or carers. Do not expect to understand this Manual on its own. Have the Lightwriter® in front of you, and try the things that you need to learn. Some models contain a 'scanner' (which allows users without hand-control to operate the Lightwriter® via a switch); where this Manual says 'press' a key, you can 'select' the same 'virtual-key' on the scan-screen, and the greater part of this book will apply (eg pressing the M2M-key or selecting ' ' on the screen have the same result). Scanning is dealt with in Section 6.

Throughout the Manual, words written in **bold** refer to something on the Lightwriter®.

The Table-of-Contents on the following pages summarises what the Lightwriter® can do.

An index to 'keywords' and to the various messages that may appear on the display is provided inside the back cover.

Statement of Intended Use - see Section 8.

Decontamination - see Section 8.

Handbook of Neurological Rehabilitation Richard J. Greenwood, Thomas M. McMillan, Michael P. Barnes, Christopher D. Ward, 2005-08-16 Changes in the focus of neurological practice worldwide have led to the need for new standard texts that reflect the current state of this expanding area of clinical expertise The second edition of the Handbook of Neurological Rehabilitation is a major reference source that fulfills this need providing an invaluable resource for all professions that work with patients suffering from neurological disorders It brings restorative neurology to the bedside and shows how a reiterative goal oriented problem solving training programme can benefit patients sometimes on a scale not achieved by pharmacological or surgical interventions The book is divided into three sections all of which have been updated Section One explores the clinical and biological principles underpinning rehabilitation practice in the context of neurological disablement Section Two describes the assessment treatment and management of the major physical cognitive and behavioural

impairments and the resulting functional deficits that may follow or accompany neurological disease The final section explores in more detail these problems and their management in relation to the more common specific disorders of the nervous system The text emphasises the fact that rehabilitation is an ongoing process involving multidisciplinary problem solving goal setting and education in which organised care is more effective than unorganised care and the breakdown of professional barriers within rehabilitation to facilitate the use of combined treatment techniques improves outcome It describes the contribution made by neural reorganisation and compensatory mechanisms to recovery of function focuses on the avoidance of secondary deficit and explores the physical cognitive affective and behavioural problems that may occur after neurological damage At a time when new medical technologies threaten to fragment the integrity of medical care at individual and societal levels it is crucial that all those involved in the management of chronic neurological disease have a working knowledge of the contents of this book Their perspective on clinical practice will then be truly integrated and holistic and their patients will benefit accordingly **The Universal Access Handbook** Constantine
