

2. Mark the "A" and "B" drill holes and the four corners. Join the corners using the edge of the template as a straight edge.

3. Drill the mounting holes and cut out the rectangular hole.

4. Secure the mounting strips to the panel using two of the six fillister-head screws provided.

In the hardware package there are 6 fillister-head screws $\frac{3}{4}$ inches long and 6 fillister-head screws $1\frac{1}{4}$ inches long. The different length screws are for varying panel thicknesses. For panels under $\frac{1}{2}$ -inch thick, use the $\frac{3}{4}$ -inch screws.

Insert a screw in the center holes ("B" holes). Tighten so that the screw pulls into the wood half the thickness of its head.

5. Secure the installation brackets to the rectangular cutout using the four remaining fillister-head screws in the hardware package.

6. Place the template over the four mounting screws. The mounting screws should be centered in the "A" and "B" holes on the template. The sides of the PANLOC brackets should match the vertical dash lines on the template. If necessary push with a suitable tool to align. The edge of the screw heads also should just be tangent with the edge of the PANLOC brackets.

7. Insert the power cord through the opening. Slide the unit in till it stops at the adjust position.
