Teaching and Learning the Arts in Higher Education with Technology Joyce Hwee Ling Koh, Rebecca Yen Pei Kan, 2021-12-02 This book is an inquiry about the possibilities of using technology to support the education of artists within higher education contexts Even though technology enhanced learning and teaching may seem incongruent with the long established studio based cultures of making and performing it is increasingly becoming a pivotal point to connect artistes to potential audience and markets Amidst the COVID 19 pandemic technology is also the crucial linchpin for educational

continuity of student artists This book explores how technology could enhance the education of artists and designers as they continue to create make and add value to life and society through their artistry It draws upon the experiences of the Nanyang Academy of Fine Arts NAFA a pioneering arts institution in Singapore with over 80 years of institutional history Through 9 vignettes this book illustrates technology enhanced pedagogical practices that have been implemented in different artistic learning spaces including classroom studio and stage as well as institutional support strategies With a naturalistic stance these chapters seek to illuminate realistic pictures of teaching and learning that are being uncovered by artist educators as they sought to integrate technology within teaching practices using available technologies and within the classes that they are teaching It is hoped that this book will stimulate conversation among artist educators about possible pedagogical models as well as inform higher arts institutions about the contextual strategies needed to support the creation of technology enhanced pedagogical practices *Unpacking Technological Pedagogical Content Knowledge for Classroom Practice* Colin Lu, Wenli Chen, 2025-08-10 This book immerses readers in an illuminating exploration of Technological Pedagogical Content Knowledge TPACK within the context of professional development for educators Based on a systematic examination of classroom realities this research intensive book delves into the intricate interplay between teachers perceived TPACK proficiency their lesson design and the actual enactment of these lessons It emphasizes the role of TPACK in empowering teachers to integrate Information and Communication Technology ICT effectively into their pedagogical practices thereby enhancing 21st Century Competencies 21CC in students This book seeks to unravel the alignment or potential misalignment between educators self assessed TPACK levels and the practical application of TPACK principles in the classroom It provides nuanced insights into the strategies employed by teachers drawing from authentic classroom experiences These insights serve as a bridge between TPACK theory and its effective integration into instructional practices Engaging and thought provoking the various chapters invite readers on an academic journey that unearths practical insights and actionable strategies for enriching the educational experience in the digital era This book represents a vital resource for educators researchers and policymakers dedicated to advancing technology integration in educational settings It also extends its benefits to educators who have engaged in TPACK design scaffold professional development and those keen on navigating the dynamic landscape of pedagogy content and technology **Naturalizing Digital Immigrants** Katie Alaniz, Dawn Wilson, 2015-03-19 Effective educational leadership entails continuously seeking and implementing innovative professional development opportunities for teachers and support staff In today s age of rapid technology expansion within educational settings professional development targeting technology integration remains an area of tremendous need This guidebook details the process of collegial coaching for technology integration within educational environments and is intended for use within a variety of settings from primary classrooms through high schools to graduate educational leadership and instructional technology courses and beyond **Learning from Dynamic Visualization** Richard Lowe, Rolf

Ploetzner,2017-05-18 This volume tackles issues arising from today's high reliance on learning from visualizations in general and dynamic visualizations in particular at all levels of education. It reflects recent changes in educational practice through which text no longer occupies its traditionally dominant role as the prime means of presenting to be learned information to learners. Specifically, the book targets the dynamic visual components of multimedia educational resources and singles out how they can influence learning in their own right. It aims to help bridge the increasing gap between pervasive adoption of dynamic visualizations in educational practice and our limited understanding of the role that these representations can play in learning. The volume has recruited international leaders in the field to provide diverse perspectives on the dynamic visualizations and learning. It is the first comprehensive book on the topic that brings together contributions from both renowned researchers and expert practitioners. Rather than aiming to present a broad general overview of the field, it focuses on innovative work that is at the cutting edge. As well as further developing and complementing existing approaches, the contributions emphasize fresh ideas that may challenge existing orthodoxies and point towards future directions for the field. They seek to stimulate further new developments in the design and use of dynamic visualizations for learning as well as the rigorous systematic investigation of their educational effectiveness. The volume sheds light on the complex and highly demanding processes of conceptualizing, developing, implementing dynamic visualizations in practice as well as challenges relating research application perspectives.

Advancing STEM Education and Innovation in a Time of Distance Learning González-Lezcano, Roberto Alonso,2022-10-21 Due to the recent global pandemic, educators of science and technology have had to pivot and adapt their delivery to create alternative virtual means of delivery. The COVID-19 pandemic has influenced a rapid change in teaching and learning in higher education. It is reshaping curriculum demands, the 21st-century digital competence challenges, and learning technologies. These changes in education are likely to endure well past the COVID-19 pandemic, making it crucial for educators to consider teaching and learning under the perspectives of digital education and innovation. **Advancing STEM Education and Innovation in a Time of Distance Learning** highlights the contemporary trends and challenges in science, technology, mathematics, and engineering education. The chapters present findings and discussions of relevant research studies and theoretical frameworks for the provision of science, technology, engineering, and technical subjects. It not only presents successful practice examples from before and during the COVID-19 pandemic but also provides useful information to assist educators in understanding the demands and challenges of digital education. Covering topics such as ethnically diverse students, foreign language learning, and mobile gamification, this premier reference source is an essential resource for educators and administrators of both K-12 and higher education, pre-service teachers, teacher educators, librarians, government officials, researchers, and academicians.
