Mechanical Drawing Problems (Classic Reprint) Charles William Weick,2015-07-06 Excerpt from Mechanical Drawing Problems This volume is a book of examples and problems for the study of mechanical drawing It is intended to be used under the direction of a teacher although the ambitious and painstaking student can solve many of the problems without such aid It aims to provide a large selection of typical drawings carefully worked out as examples each one of which is accompanied by appropriate problems suitable for elementary and advanced work in mechanical drawing Explanations and directions are when needed expressed in simple and direct language and in the fewest possible words The principles of the construction of a drawing are shown in the examples in the graphic language of the draftsman The book is divided into three parts The First Part gives in brief outline such matter as the student will need to know before beginning work It contains also a limited number of geometrical constructions which will be found helpful in solving some of the problems given The Second Part the practical work is divided into four sections namely Projections Developments and Intersections Isometric Drawings and Machine Details Nearly all the example drawings are fully dimensioned and where necessary described by explanatory notes They are not to be copied but are intended to serve as a guide to the student when making his own drawings for which

directions are given in the form of problems In each section there are many more problems than any one student can work in the amount of time which is usually allotted to the subject of mechanical drawing and a judicious selection must necessarily be made by the teacher to meet the individual students requirement These problems are arranged in the order of their difficulty The problems given in the beginning of each section are not too difficult for a beginner in mechanical drawing while those toward the end of the sections will be found suitable for advanced students Each section begins with problems that are suitable for Junior High Schools High Schools and Evening Schools and advances gradually to problems that are more difficult of solution suitable for Vocational Schools Trade Schools and Colleges About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

needle or chisel point and to avoid making holes in the paper with the compasses Given and required lines should be drawn fine in ink and construction lines drawn in pencil only but to distinguish them in these problems given lines are heavy required lines fine and construction lines broken About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
