

6. Two members of the PTA committee have proposed the accompanying questions to ask in seeking parent's opinions. Question 1 is "Should elementary school-age children have to pass high-stakes tests in order to remain with their classmates?" and Question 2 is "Should schools and students be held accountable for meeting yearly learning goals by testing students before they advance to the next grade?" Complete parts a and b below.
- a) Do you think responses to these two questions might differ? How? What kind of bias is this?
- A. The answers for these two questions will definitely differ. Question 1 will probably get many "No" answers, while Question 2 will get many "Yes" answers. This is an example of response bias.
- B. The answers for these two questions will not differ. Both questions will only be answered by a small portion of the parents. This is an example of undercoverage of the population.
- C. The answers for these two questions will definitely differ. Question 1 will probably get many "Yes" answers, while Question 2 will not get many answers. This is an example of relying on voluntary response.
- D. The answers for these two questions will not differ. The wording of both questions suggests a negative response. This is an example of nonresponse bias.
- b) Propose a question with more neutral wording that might better assess parental opinion. Choose the correct answer below.
- A. "Should students be held back for below average scores on standardized tests?"
- B. "Do you think standardized tests are appropriate for deciding whether a student should be promoted to the next grade?"
- C. "Is it appropriate to use standardized tests to rate a student's intelligence in order to decide whether the student is ready for the next grade?"
- D. "Do you think standardized tests should be used to determine if a student is capable of handling the material taught in the next grade?"
7. Fill in the blank.
You are trying to study the amount of financial aid students at your University receive. You sample 50 students and find out the average size of their financial aid packages. The average of your sample is a _____ (Population parameter/sample statistic)
8. Fill in the blank.

Rockswold,Terry A. Krieger,2004-10 Beginning

Algebra with Applications and Visualization offers an innovative approach to the beginning algebra curriculum that allows students to gain both skills and understanding. This text not only prepares students for future mathematics courses but it also demonstrates to students the relevance of mathematics. Real data, graphs, and tables play an important role in the course, giving meaning to the numbers and equations that students encounter. This approach increases student interest, motivation, and the likelihood for success. Many students think in visual, concrete terms and not abstractly. This text helps students learn mathematics better by moving from the concrete to the abstract. It makes use of multiple representations: verbal, graphical, numerical, and symbolic applications, visualization, and technology.
