

CONIC SECTIONS

- Conic sections, also called conic, in geometry, any curve produced by the intersection of a plane and a right circular cone.
- Conics may also be described as plane curves that are the paths (loci) of a point moving so that the ratio of its distance from a fixed point (the focus) to the distance from a fixed line (the directrix) is a constant, called the eccentricity of the curve.
- If the eccentricity is zero, the curve is a circle; if equal to one, a parabola; if less than one, an ellipse; and if greater than one, a hyperbola
- Every conic section corresponds to the graph of a second degree polynomial equation of the form $Ax^2 + By^2 + 2Cxy + 2Dx + 2Ey + F = 0$

Winning the Math Homework Challenge Catheryne Draper, 2016-12-21 If you've ever been stumped by your child's math homework this is the book for you. Winning the Math Homework Challenge shares students' reasoning, thinking, and even misunderstandings about mathematics to provide you with the opportunity to see math through their eyes, including both the clarity and the confusion. Armed with this new sight and therefore insight, parents will be able to effectively communicate with their child about math experiences. This book focuses more on the why behind math relationships explained in plain English and through images that show mathematical relationships. The ability to recognize connections among math topics significantly reduces the confusion and frustration that can accompany math homework. By including more images and fewer formulas, readers, especially the visual spatial learners, are better equipped to understand how math concepts connect to each other. Finding and understanding these connections will allow parents to find their own math mojo and to pass on that legacy to their child. *Scientific American*, 1862 *The Engineer*, 1858 **Big Book of Home Learning** Mary Pride, 1991-07 Learn at home with exciting products for all school subjects.
