NRCS 450: Information and Examples of POTG Contents, Section II, Natural Resources Information

A. Section II of the POTG will contain the following, at a minimum:

- (1) **Soil Information:** Official soil survey information comprises five parts:
 - (i) Statements about which soil maps, data, and interpretations are official for each USDA program purpose and where to find those maps, data, and interpretations. For example, official lots of highly erodible soil maps may exist only as hard copy in the POTG while other standard data and interpretations exist as a link to the Soil Data Mart;
 - (ii) Soil maps. Where an archived version is required for program purposes (i.e., DNR soil map in a survey area which has since been updated), both the archived map and the contemporary map are included in the POTG and their respective uses clearly identified;
 - (iii) Soil survey data to accompany the soil maps, which exist as a link to the Soil Data Mart. Where an archived version is required, the data may exist either electronically or in hard copy. At a minimum, the following data will be available:
 - Map unit symbol and map unit name for each symbol shown on the official soil survey map(s);
 - Data elements required to meet national program needs and the needs of the area served by the Field Office Technical Guide. The list of required data elements must, by necessity, be somewhat flexible to accommodate data needs created as a result of new planning or engineering practices, models, or interpretive criteria;
 - (iv) Brief soil description for each map unit identified on the soil maps; and
 - (v) Interpretations required to meet national program needs and the needs of the area served by the POTG. Archived links may be required for some program needs and will be clearly identified as to their intended purpose.

 - Record low and high temperatures;
 - Averages for such items as rainfall, length of growing season, temperatures, wind velocities, hail incidence, and snowfall;
 - Water supply data;
 - Probability of receiving selected amounts of precipitation by month; and
 - Frost-free periods.
 - (ii) References should be made to other climatic data in other field office documents.
- (3) **Cultural Resources Information:**
 - (i) Cultural resources include historic, archaeological, architectural, historic engineering, and traditional cultural properties and historic and cultural landscapes. There are criteria of significance for cultural resources that NRCS must consider during program, project and conservation planning; these criteria (of eligibility for listing in the National Register of
