

Pedro's Pool Party

Geometry Performance Task

Pedro's family is planning a pool party for Pedro's graduation, and they need to rearrange their backyard to set up for the party. Below is the current layout of their yard and a space to create a new layout. Follow the directions below to help Pedro's family determine the best layout for the party.

Current Layout:

New Layout:

- Pedro wants to move the lounge chairs so that they are the same distance from the pool but on the other side of it. He wants to place the lounge chairs so that if you sit on them, you are facing the pool. Draw the lounge chairs on the new layout, and describe the transformations that would map them from their old location to their new location.
- Pedro's dad bought a Super-Speed waterslide to set up on the lawn. The waterslide unfolds to be twice its current length and width. Draw the unfolded slide on the new layout. What transformations map the original area covered by the slide to the new area? And the original area and the new area similar? Explain how you know.
- Pedro wants to move the lounge chair to the pool. Draw the lounge on the new layout so that they are closer to the pool. What transformations (s) would map each lounge from its old location to its new location? Are the two lounges congruent? Explain how you know.
- Pedro's mom wants to move the grill farther from the waterslide. Use two different transformations (one translation) to move the grill. Draw the grill on the new layout, and describe the two transformations that map the grill from its old location to its new location.

Machine Learning and Knowledge Discovery in Databases Peter A. Flach,Tijl De Bie,Nello Cristianini,2012-09-08 This two volume set LNAI 7523 and LNAI 7524 constitutes the refereed proceedings of the European Conference on Machine Learning and Knowledge Discovery in Databases ECML PKDD 2012 held in Bristol UK in September 2012 The 105 revised research papers presented together with 5 invited talks were carefully reviewed and selected from 443 submissions The final sections of the proceedings are devoted to Demo and Nectar papers The Demo track includes 10 papers from 19 submissions and the Nectar track includes 4 papers from 14 submissions The papers grouped in topical sections on association rules and frequent patterns Bayesian learning and graphical models classification dimensionality reduction feature selection and extraction distance based methods and kernels ensemble methods graph and tree mining large scale distributed and parallel mining and learning multi relational mining and learning multi task learning natural language processing online learning and data streams privacy and security rankings and recommendations reinforcement learning and planning rule mining and subgroup discovery semi supervised and transductive learning sensor data sequence and string mining social network mining spatial and geographical data mining statistical methods and evaluation time series and temporal data mining and transfer learning

Faces of Geometry Paola Magnaghi-Delfino,Giampiero Mele,Tullia Norando,2021-04-03 The volume reports on interdisciplinary discussions and interactions between theoretical research and practical studies on geometric structures and their applications in architecture the arts design education engineering and mathematics These related fields of research can enrich each other and renew their mutual interest in these topics through networks of shared inspiration and can ultimately enhance the quality of geometry and graphics education Particular attention is dedicated to the contributions that women have made to the scientific community and especially mathematics The book introduces engineers architects and designers interested in computer applications graphics and geometry to the latest advances in the field with a particular focus on science the arts and mathematics education

Designing Authentic Performance Tasks and Projects

Jay McTighe,Kristina J. Doubet,Eric M. Carbaugh,2020-02-18 Aimed at the growing number of educators who are looking to move beyond covering the curriculum *Designing Authentic Performance Tasks and Projects* provides a comprehensive guide to ensuring students deeper learning in which they can transfer their knowledge skills and understandings to the world beyond the classroom Readers will learn how to Create authentic tasks and projects to address both academic standards and 21st century skills Apply task frames to design performance tasks that allow voice and choice for students Design and use criterion based evaluation tools and rubrics for assessment including those for students to use in self assessment and peer assessment Incorporate performance based instructional strategies needed to prepare students for authentic performance Differentiate tasks and projects for all students including those needing additional support or challenge Effectively manage the logistics of a performance based classroom Use project management approaches to facilitate successful implementation

of tasks and projects Develop performance based curriculum at the program school and district levels Authors Jay McTighe Kristina J Doubet and Eric M Carbaugh provide examples and resources across all grade levels and subject areas Teachers can use this practical guidance to transform their classrooms into vibrant centers of learning where students are motivated and engaged and see relevance in the work they are doing **Turbine Engine Hot Section Technology, 1985**,1985

Aeroelastic Loads Prediction for an Arrow Wing. Task 1: Evaluation of R. P. White's Method Christopher J. Borland,1983

Operational Safety for Aviation Managers John Frearson,2024-11-28 Despite the vast amount of work building the foundations of safe operations aviation accidents still happen and prior to many accidents and other safety related events there was unexpressed or ignored disquiet as the last minute approached the last minute being that time when there is no longer time for discussion or analysis only safety first action This book aims at the assurance of better outcomes from these time critical situations whose genesis lies in the time period immediately preceding the last minute This assurance of better outcomes can best be assured by enabling operational managers to adopt new paradigms in the development of SOPs building the right culture and implementation of training programs relevant to good decision making required as the last minute approaches This book examines the development of the foundations for aviation safety the things that give foundational support for safety to pilots in particular but over which line pilots may have little knowledge or day to day control It provides a history of time critical safety related events providing the foundation for the understanding of the reasons why pilot inactivity indifference fixation and incapacitation can so pervade the lead up to the last minute as to leave the safe continuation of the flight resting on prompt remedial action The role of doubt how it is expressed and how it is heard is another central thread Finally the book addresses the role of flight data analysis as a valuable management tool Written for aviation managers line flight crews and those in similar operational roles in aviation related operations this book and its informal discussion style should appeal and communicate across national age experience and language boundaries to create a safer operational environment Psychology and Mathematics Education Gila Hanna,Laura Macchi,Karin Binder,Laura

Martignon,Katharina Loibl,2023-09-05 Modern Mathematics is constructed rigorously through proofs based on truths which are either axioms or previously proven theorems Thus it is par excellence a model of rational inquiry Links between Cognitive Psychology and Mathematics Education have been particularly strong during the last decades Indeed the Enlightenment view of the rational human mind that reasons makes decisions and solves problems based on logic and probabilities was shaken during the second half of the twentieth century Cognitive psychologists discovered that humans thoughts and actions often deviate from rules imposed by strict normative theories of inference Yet these deviations should not be called errors as Cognitive Psychologists have demonstrated these deviations may be either valid heuristics that succeed in the environments in which humans have evolved or biases that are caused by a lack of adaptation to abstract information formats Humans as the cognitive psychologist and economist Herbert Simon claimed do not usually optimize but rather satisfice even when

solving problem This Research Topic aims at demonstrating that these insights have had a decisive impact on Mathematics Education We want to stress that we are concerned with the view of bounded rationality that is different from the one espoused by the heuristics and biases program In Simon s bounded rationality and its direct descendant ecological rationality rationality is understood in terms of cognitive success in the world correspondence rather than in terms of conformity to content free norms of coherence e g transitivity

Internet of Vehicles and Computer Vision Solutions for Smart City Transformations Anuj Abraham,Shitala Prasad,Ahmed Alhammadi,Thierry Lestable,Ferdaous Chaabane,2025-02-19 This book compiles recent research endeavors at the intersection of computer vision CV and deep learning for Internet of Vehicles IoV applications which are pivotal in shaping the landscape of smart cities These technologies play instrumental roles in enhancing various facets of urban life encompassing safety transportation infrastructure management and sustainability The amalgamation of CV and deep learning within smart cities creates a powerful synergy that fosters safer more efficient and sustainable urban environments By harnessing these cutting edge technologies to drive data driven decision making cities can elevate the quality of life for their inhabitants mitigate environmental impact and optimize overall urban functionality Additionally this compilation provides in depth technical and scientific insights into various facets of artificial intelligence AI technologies including forthcoming trends and innovations that are poised to transform smart cities The book also extends its focus to other areas of smart city development It explores the application of these technologies in the creation of smart parking solutions discusses the role of surveillance for public safety and examines how CV and IoV can be utilized for environmental monitoring The book also delves into urban planning and infrastructure development emphasizing the importance of a data driven approach It sheds light on the social impact of smart cities and the importance of citizen engagement and discusses issues of security and privacy in the context of smart cities The book concludes with a look at future trends and challenges in the field of smart cities Targeted at researchers practitioners engineers and scientists this book is geared toward those engaged in the development of advanced algorithms for future forward smart city applications in computer vision vehicular networking communication technology sensor devices IoT communication vehicular and on road safety data security and services for IoV related devices

Human-Computer Interaction: Interaction Modalities and Techniques Masaaki Kurosu,2013-07-01 The five volume set LNCS 8004 8008 constitutes the refereed proceedings of the 15th International Conference on Human Computer Interaction HCII 2013 held in Las Vegas NV USA in July 2013 The total of 1666 papers and 303 posters presented at the HCII 2013 conferences was carefully reviewed and selected from 5210 submissions These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems The papers accepted for presentation thoroughly cover the entire field of human computer interaction addressing major advances in knowledge and effective use of computers in a variety of application areas This volume contains papers in the thematic area of human computer interaction addressing the following major topics speech
