Read the following theorems carefully:

- ① If two lines are cut by a transversal such that the corresponding angles are equal, then the lines are parallel.
- ② If two lines are cut by a transversal such that the alternate interior angles are equal, then the lines are parallel.
- ③ If two lines are cut by a transversal such that the alternate exterior angles are equal, then the lines are parallel.
- ④ If two lines are cut by a transversal such that the co-interior angles are supplementary, then the lines are parallel.

Use the above chart and complete the table below.
