

The background of the cover is a vibrant, stylized illustration of a park scene. In the center is a large, ornate fountain with multiple tiers and water spraying upwards. The fountain is surrounded by lush greenery, including large blue and pink hydrangeas in the foreground. In the background, there are trees with long, thin, brown, icicle-like structures hanging from their branches, suggesting a winter or late autumn setting. The sky is a mix of purple and blue horizontal stripes.

The Cumulative Book Index, 1913 *Asymptotic Methods for Wave and Quantum Problems* M. V. Karasev, 2003 The collection consists of four papers in different areas of mathematical physics united by the intrinsic coherence of the asymptotic methods used The papers describe both the known results and most recent achievements as well as new concepts and ideas in mathematical analysis of quantum and wave problems In the introductory paper Quantization and Intrinsic Dynamics a relationship between quantization of symplectic manifolds and nonlinear wave equations is described and discussed from the viewpoint of the weak asymptotics method asymptotics in distributions and the semiclassical approximation method It also explains a hidden dynamic geometry that arises when using these methods Three

other papers discuss applications of asymptotic methods to the construction of wave type solutions of nonlinear PDE s to the theory of semiclassical approximation in particular the Whitham method for nonlinear second order ordinary differential equations and to the study of the Schrodinger type equations whose potential wells are sufficiently shallow that the discrete spectrum contains precisely one point All the papers contain detailed references and are oriented not only to specialists in asymptotic methods but also to a wider audience of researchers and graduate students working in partial differential equations and mathematical physics School Document ,1924
