Global Citizenship Education Eva Aboagye,S. Nombuso Dlamini,2021-03-01 The idea of citizenship and conceptions of what it means to be a good citizen have evolved over time On the one hand good citizenship entails the ability to live with others in diverse societies and to promote a common set of values of acceptance human rights and democracy On the other hand in order to compete in the global economy nations require a more innovative autonomous and reflective workforce

meaning good citizens are also those who successfully participate in the economic development of themselves and their country. These competing conceptions of good citizenship can result in people's participation in activities such as profit-driven labor exploitation that contradict human rights and democratic tenants. Thus global citizenship education is fundamental to teaching learning and redressing sociopolitical economic and environmental exploitation around the world. Detailing the historical development of this field of study to achieve recognition, *Global Citizenship Education Challenges and Successes* provides a critical discourse on global citizenship education. GCE Authors in this collection discuss the underpinnings of global citizenship education via contemporary theories and methodologies as well as specific case studies that illustrate the application of GCE initiatives. Editors Eva Aboagye and S Nombuso Dlamini aim to motivate learners and educators in post-secondary institutions not only to understand the issues of social and economic inequality and political and civil unrest facing us but also to take action that will lead to equitable change in both local and global spaces.

Global Citizenship Education Lynn Davies, Clive Harber, Hiromi Yamashita, 2005 [The Dimensions of Global Citizenship](#) Darren J. O'Byrne, 2004-11-23 *The Dimensions of Global Citizenship* takes issue with the assumption that ideas about global citizenship are merely Utopian ideals. The author argues that far from being a modern phenomenon, world citizenship has existed throughout history as a radical alternative to the inadequacies of the nation-state system. Only in the post-war era has this ideal become politically meaningful. This social transformation is illustrated by references to the activities of global social movements as well as those of individual citizens.

Global Citizenship Education Abdeljalil Akkari, Kathrine Maleq, 2020-08-07 This book takes a critical and international perspective to the mainstreaming of the Global Citizenship Concept and analyses the key issues regarding global citizenship education across the world. In that respect, it addresses a pressing need to provide further conceptual input and to open global citizenship agendas to diversity and indigeneity. Social and political changes brought by globalisation, migration and technological advances of the 21st century have generated a rise in the popularity of the utopian and philosophical idea of global citizenship. In response to the challenges of today's globalised and interconnected world such as inequality, human rights violations and poverty, global citizenship education has been invoked as a means of preparing youth for an inclusive and sustainable world. In recent years, the development of global citizenship education and the building of students' global citizenship competencies have become a focal point in global agendas for education, international educational assessments and international organisations. However, the concept of global citizenship education still remains highly contested and subject to multiple interpretations and its operationalisation in national educational policies proves to be challenging. This

volume aims to contribute to the debate question the relevancy of global citizenship education's policy objectives and to enhance understanding of local perspectives ideologies conceptions and issues related to citizenship education on a local national and global level To this end the book provides a comprehensive and geographically based overview of the challenges citizenship education faces in a rapidly changing global world through the lens of diversity and inclusiveness **The**

Practice of Global Citizenship Luis Cabrera, 2010-10-14 In this novel account of global citizenship Luis Cabrera argues that all individuals have a global duty to contribute directly to human rights protections and to promote rights enhancing political integration between states The Practice of Global Citizenship blends careful moral argument with compelling narratives from field research among unauthorized immigrants activists seeking to protect their rights and the Minuteman activists striving to keep them out Immigrant rights activists especially those conducting humanitarian patrols for border crossers stranded in the brutal Arizona desert are shown as embodying aspects of global citizenship Unauthorized immigrants themselves are shown to be enacting a form of global civil disobedience claiming the economic rights central to the emerging global normative charter while challenging the restrictive membership regimes that are the norm in the current global system Cabrera also examines the European Union seeing it as a crucial laboratory for studying the challenges inherent in expanding citizen membership *Exploring the Complexities in Global Citizenship Education* Lauren Ila

Misiaszek, 2019-08-14 With a focus on the Global South this book argues that awareness and discussion of the politics of equity and inclusion in global citizenship education GCE research are essential to the future of nuanced and effective research in this area The book explores the notion of heavily regulated hard spaces to examine areas of institutional blindness and reflects on ways to negotiate the issue of sensitivity in an institutional context exploring how one's sensitivity relates to pedagogy and ethics Through this in depth metadiscussion of GCE research the book provides a complex portrait of unique challenges in this domain and explores the nuanced experience of navigating temporal intersections of the global the citizen and education in geographically and thematically obstructed spaces This book will be of great interest to researchers policymakers academics and postgraduate students in the fields of global education comparative education and educational policy

Theoretical and Empirical Foundations of Critical Global Citizenship Education Carlos Alberto Torres, 2017-04-21 In the first volume in the Critical Global Citizenship Education series Torres combines theoretical and empirical research to present an original perspective on global citizenship education as a vitally important way of learning in a globalized world In examining the requirements for effective global citizenship education and education reform he investigates pathways to citizenship building at the local national and global levels and urges development of teaching methods teacher education and curriculum within a social justice education framework Taking into account post colonial perspectives political realities at play and practical implications Torres provides a succinct but comprehensive understanding of how global citizenship education can expand the concept of civic education in a global society and interrupt inequality This

volume considers the ways that global citizenship education has been incorporated and is used by international institutions governments and the academy and provides a clear framework for anyone struggling to make sense of the tensions and complexities of global citizenship education today Critical Literacy in Global Citizenship Education ,2011

Decolonizing Global Citizenship Education Ali A Abdi,Lynette Shultz,Thashika Pillay,2015-12-01 The ideas for this reader came out of a conference organized through the Centre for Global Citizenship Education and Research CGCER at the University of Alberta in 2013 With the high expansion of global citizenship education scholarship in the past 15 or so years and with most of this scholarship produced in the west and mostly focused on the citizenship lives of people in the so called developing world or selectively attempting to explain the contexts of marginalized populations in the west the need for multidirectional and decolonizing knowledge and research perspectives should be clear Indeed the discursive as well as the practical constructions of current global citizenship education research cannot fulfill the general promise of learning and teaching programs as social development platforms unless the voices of all concerned are heard and validated With these realities this reader is topically comprehensive and timely and should constitute an important intervention in our efforts to create and sustain more inclusive and liberating platforms of knowledge and learning This collection of cutting edge theoretical contributions examines citizenship and neo liberal globalization and their impacts on the nexus of the local and global learning production of knowledge and movements of people and their rights Case studies in the collection also provide in depth analysis of lived experiences that challenge the constructed borders which derive from colonial and imperial re structuring of the contemporary world and nation states The contributors articulate agency in terms of both resistance and proactive engagement toward the construction of an alternative world which acknowledges equality justice and common humanity of all in symbiosis with the social and natural environment It is a valuable reader for students scholars practitioners and activists interested in the empowering possibilities of decolonized global citizenship education N Dr
