South African Schooling: The Enigma of Inequality Nic Spaull,Jonathan D. Jansen,2019-11-05

This volume brings together many of South Africa s leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system

Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI [Excellence Gaps in Education](#) Jonathan A. Plucker, Scott J. Peters, 2020-01-15 2017 Texas Association for Gifted and Talented Legacy Scholar Book Award 2017 National Association of Gifted Children Scholar Book of the Year Award In Excellence Gaps in Education Jonathan A Plucker and Scott J Peters shine a spotlight on excellence gaps the achievement gaps among subgroups of students performing at the highest levels of achievement Much of the focus of recent education reform has been on closing gaps in achievement between students from different racial ethnic or socioeconomic backgrounds by bringing all students up to minimum levels of proficiency Yet issues related to excellence gaps have been largely absent from discussions about how to improve our schools and communities Plucker and Peters argue that these significant gaps reflect the existence of a persistent talent underclass in the United States among African American Hispanic Native American and poor students resulting in an incalculable loss of potential among our fastest growing populations Drawing on the latest research and a wide range of national and international data the authors outline the scope of the problem and make the case that excellence gaps should be targeted for elimination They identify promising interventions for talent development already underway in schools and provide a detailed review of potential strategies including universal screening flexible grouping targeted programs and psychosocial interventions Excellence Gaps in Education has the potential for changing our national conversation about equity and excellence and bringing fresh attention to the needs of high potential students from underrepresented backgrounds **Brains, Media and Politics** Rodolfo Leyva, 2019-11-25 Following the 2007 2008 global financial crisis a number of prominent academics journalists and activists were quick to pronounce the demise of neoliberal capitalism and governance This rather optimistic prediction however underestimated the extent to which neoliberalism has

shaped the 21st century world order and become entrenched in our sociopolitical and cognitive fabric. Indeed 11 years after the crisis and in spite of the significant levels of socioeconomic inequality, psychological distress and environmental destruction generated by neoliberal policies and corresponding business and cultural practices, the ideological hegemony of neoliberalism has not been supplanted nor has it really faced any serious unsettling. How then has neoliberalism inflected and shaped our common sense understandings of what is politically, economically and culturally viable? To help answer this question, this book combines leading theories from sociology, media communication research, developmental psychology and cognitive science and draws on primary evidence from a unique mix of ethnographic survey and experimental studies of young people's leisure practices and educational experiences of young adults, political socialisation processes in relation to exposure to social networking sites and of the effects of commercial media viewing on material values and support for social welfare. In doing so, it provides a nuanced and robustly empirically tested account of how the conscious and non-conscious cognitive dimensions of people's subjectivities and everyday social practices become interpellated through and reproductive of neoliberal ideology. As such, this book will appeal to scholars across the social and behavioural sciences with interests in neoliberalism, political engagement, enculturation, social reproduction and media effects.

*Research on Global Citizenship Education in Asia* Theresa Alviar-Martin, Mark C. Baildon, 2021-01-01. This edited book provides new research highlighting philosophical traditions, emerging perceptions and the situated practice of global citizenship education (GCE) in Asian societies. The book includes chapters that provide 1) conceptions and frameworks of GCE in Asian societies, 2) analyses of contexts, policies and curricula that influence GCE reform efforts in Asia, and 3) studies of students and teachers' experiences of GCE in schools in different Asian contexts. While much citizenship education has focused on constructions and enactments of GCE in Western societies, this volume re-centers investigations of GCE amid Asian contexts, identities and practices. In doing so, the contributors to this volume give voice to scholarship grounded in Asia, and the book provides a platform for sharing different approaches, strategies and research across Asian societies. As nations grapple with how to prepare young citizens to face issues confronting our world, this book expands visions of how GCE might be conceptualized, contextualized and taught, and how innovative curriculum initiatives and pedagogies can be developed and enacted.

**Burnt by Democracy** Jacqueline Kennelly, 2023-11-30. *Burnt by Democracy* traces the political ascendance of neoliberalism and its effects on youth. The book explores democracy and citizenship as described in interviews with over forty young people, ages 16 to 30, who have either experienced homelessness or identify as an activist living in five liberal democracies: Canada, Australia, New Zealand, the United States, and the United Kingdom. Highlighting significant cuts to social and affordable housing, astronomical increases in the costs of higher education, and the transformation and erosion of state benefits systems, Jacqueline Kennelly argues that democracy's decline is not occurring because young people are apathetic or focused on informal politics or unaware of their civic duties. Rather, it is because of collective misunderstanding about how democracy is actually structured, how individuals

learn to participate and how growing wealth inequality has undermined the capacity of those at the bottom to meaningfully advocate for changes that might improve their conditions Against a vivid and often heart breaking backdrop of stories from young people struggling to survive and thrive under conditions of ever expanding state retrenchment and inequality *Burnt by Democracy* makes a timely and impassioned plea for protecting and strengthening democracy by truly levelling the playing field for all

**Generation Jobless?** P. Vogel, 2015-03-05 Offering guidance on the opportunities and threats for future generations and featuring interviews with business leaders this book provides a constructive look at change It directs the youth to become job creators not job seekers and to approach the corporate and political worlds with an entrepreneurial mind set
