Charles F. Webber, Judy L. Lupart

Grade 6 Alberta Education:

Resources in Education ,2001-10

Science Education in Canada Christine D. Tippet, Todd M. Milford, 2019-07-01

This book offers a meso level description of demographics science education and science teacher education Representing all 13 Canadian jurisdictions the book provides local insights that serve as the basis for exploring the Canadian system as a whole and function as a common starting point from which to identify causal relationships that may be associated with Canada's successes The book highlights commonalities consistencies and distinctions across the provinces and territories in a thematic analysis of the 13 jurisdiction specific chapters Although the analysis indicates a network of policy and practice issues warranting further consideration the diverse nature of Canadian science education makes simple identification of causal relationships elusive Canada has a reputation for strong science achievement However there is currently limited literature on science education in Canada at the general level or in specific areas such as Canadian science curriculum or science teacher education This book fills that gap by presenting a thorough description of science education at the provincial territorial level as well as a more holistic description of pressing issues for Canadian science education

Middle Level Teacher Preparation across International Contexts Cheryl R. Ellerbrock, Katherine M. Main, David C. Virtue, 2022-09-02

This volume offers a cross national analysis of teacher education programs designed to prepare teachers for work in middle level schools The book showcases 15 detailed case studies of courses at institutions across North America Europe Asia and Africa including from countries currently underrepresented in middle level literature which provide detailed information on programming whilst foregrounding the political social and cultural factors which have influenced priorities within teacher education Underpinning the book is a comparative case study framework used to identify divergences and commonalities within and across nations whereby factors such as globalization policy and socio cultural views of teaching and adolescence are explored as determinants of the nature success and challenges of middle level teacher preparation This text will benefit scholars academics and students in the fields of middle level education teacher education and international and comparative education Those involved with educational policy and politics as well as teacher training and the sociology of education more broadly will also benefit from this volume

Student Reactions to Learning with Technologies: Perceptions and Outcomes Moyle, Kathryn, Wijngaards, Guus, 2011-09-30 While the creation and adoption of new technologies has increased in recent years the educational sector often limits technology use Despite this many researchers are convinced of the vital role that technologies can play in learning and teaching Student Reactions to Learning with Technologies Perceptions and Outcomes brings together recent research findings about the views and expectations of students when including technologies in their studies The chapters in this book suggest that the use of technologies in teaching not only makes learning more interesting but also offers possibilities for variations in the learning processes While this book does not offer irrevocable opinions and definitive views or insights it provides a useful lens for viewing the world of students and providing insights into

the possibilities for accessing and conducting similar research **Canadiana** ,1991 Researching Pedagogy and Practice with Canadian Mathematics Teachers David A Reid,Christine Suurtamm,Annie Savard,Elaine Simmt,Dominic Manuel,Lisa Lunney Borden,Richard Barwell,2020-06-01 The past two decades have seen an increased interest in education especially in core areas such as mathematics language and science This is in part a consequence of the increase in the number of international comparisons of educational outcomes such as PISA and TIMSS Much research has focused on the contributions that curricula financial resources parental support and so on might have on educational outcomes A factor that seems likely to have a very significant effect on student achievement teachers practices and beliefs has received little attention This book reports results from a research program that sought to develop and employ research methods to compare teachers practices and beliefs across Canada It provides insight into the challenge of such research and describes teachers contexts beliefs and practices and how they differ in four regions and across two languages Using a multivocal ethnography approach Tobin 1999 teachers were involved in the preparation and discussion of videos of their own teaching and that of others This approach resulted in not only insights into the teachers pedagogies and practices but also opportunities for the teachers to reflect on their own teaching in new ways and for researchers to reflect on research practices and orientations The work is innovative in several ways In a field crowded with research on teachers practices beliefs and knowledge this research helps to unearth the implicit values that underlie the way teachers see teaching itself Through the process of observation of each other s practice the teachers became aware of their own pedagogies giving them new insights into their values and practices Researchers also engaged in a parallel process of reflection on their own practices as observers of teachers with similar insights into the values guiding their work This book will be of interest to government policy makers teachers and teacher educators as well as researchers in Mathematics Education Members of the AERA SIG in Research in Mathematics Education the Canadian Mathematics Education Study Group the NCTM and provincial Mathematics teacher associations are potential readers Praise for *Researching Pedagogy and Practice with Canadian Mathematics Teachers* What a treasure This book is an important resource for anyone interested in high quality mathematics teaching It fills a gap in our understanding of how mathematics is taught across Canada where students are among the highest performing on international mathematics assessments The studies reported are conceptually grounded methodologically rigorous and filled with nuanced observations of the similarity and variation in classroom teaching across many of the Canadian provinces Edward A Silver Senior Associate Dean for Research Graduate Studies William A Brownell Collegiate Professor of Education Professor of Mathematics University of Michigan *Studies in Education Policy* , **Becoming a History Teacher** Ruth Sandwell,Amy von Heyking,2014-09-17 A revolution in history education is propelling historical thinking and knowing to the forefront of history and social studies education in North America and beyond Teachers teacher education programs schools and ministries of education across Canada are all among those embracing the idea that knowing history means knowing how to think

historically *Becoming a History Teacher* is a collection of thoughtful essays by history teachers historians and teacher educators on how to prepare student teachers to think historically and to teach historical thinking Covering the teacher s experience before during and after formal certification *Becoming a History Teacher* contains a wide range of resources for teachers and educators including information on the latest research in history education and examples of successful history teaching activities
