

Introduction to SmartPlant License Manager

Intergraph® SmartPlant License Manager (SPLM) allows you to accurately track how many users are concurrently accessing plant design software. It also helps you comply with your Software Licensing Agreement. Intergraph recommends you install SmartPlant License Manager prior to any of the software it licenses.

SmartPlant License Manager is client/server-based software. One or more central servers can be used to maintain licensing information for all plant design software on a network. The licensing information can be on a single server, but the licenses float so any computer on the network can use them. Both the client computer and the license server must have SmartPlant License Manager installed. Because licensing has little impact on computer performance, any computer on your domain with a fixed TCP/IP address can be a license server.

SmartPlant License Manager supports the following products and license types:

FrameWorks® Plus

ISOGEN (Batch ISOGEN and Interactive ISOGEN)

Pelican Forge SupportModeler™ and SupportManager™

PDS®: PDS 3D, PDS 2D, PDS IDM, PDS PID

SDNF Import

SmartPlant Electrical

SmartPlant® Instrumentation (formerly INtools®)

SmartPlant P&ID

SmartPlant Review

SmartSketch®

Notes

- Some SmartSketch installations do not require licensing. SmartPlant Review Publisher does not require SmartPlant License Manager licensing.
- This guide includes the INtools licensing information and request forms. SmartPlant Instrumentation (formerly INtools 7.0 and above) utilizes the current SmartPlant License Manager request forms. INtools (6.0 and below) customers should continue to use the internal licensing software.
