

Installing a Service Manually

- Installutil.exe is a command-line utility used to install—or uninstall—a Windows Services application manually. The user must have Administrator permissions to use Installutil.exe.
- After building your project, use the command line and navigate to the folder that contains your executable file. Then run:
`installutil MyService.exe`
- To uninstall the Windows Service, repeat the process, adding the /u parameter:
`installutil /u MyService.exe`

Note: in these examples, *MyService.exe* is used to represent the name of your project's output. You would replace *MyService.exe* with the file that was created when you built your project.
