Le Capitalisme Sans Capital:

The Mitterrand Years Mairi Maclean, 2016-07-27 A considered look at the Mitterrand presidency as a whole its place in French history and the trends for the twenty first century emerging under Chirac The fourteen years during which Mitterrand was at the helm ushered in fundamental change in many different domains as France faced up to new challenges in an increasingly uncertain world This study evaluates the impact and legacy of the Mitterrand years in the following key areas the Republic socialism Europe and foreign affairs business and the economy society and culture *Conservative Liberalism, Ordo-liberalism, and the State* Kenneth Dyson, 2021-01-21 This book uses extensive original archival and elite interview research to examine the attempt to rejuvenate liberalism as a means of disciplining democracy and the market through a new rule based economic and political order This rebirth took the form of conservative liberalism and in its most developed form Ordo liberalism It occurred against the historical background of the great transformational crisis of liberalism in the first part of the twentieth century Conservative liberalism evolved as a cross national phenomenon It included such eminent and cultured liberal economists as James Buchanan Frank Knight Henry Simons Ralph Hawtrey Jacques Rueff Luigi Einaudi Walter Eucken Friedrich Hayek Alfred M ller Armack Wilhelm R pke Alexander R stow and Paul van Zeeland as well as leading lawyers like Louis Brandeis Franz B hm and Maurice Hauriou Conservative liberals also played a formative role in establishing new international networks notably the Mont P lerin Society The book investigates the rich intellectual inheritance of this variant of new liberalism from aristocratic liberalism ethical philosophy and religious thought It also locates the social basis of conservative liberalism and Ordo liberalism in the cultivated bourgeois intelligentsia The book goes on to examine the attempts to embed this new disciplinary form of liberalism in Britain France Germany Italy and the United States and to consider the determinants of its varying significance across space and over time It concludes by assessing the historical significance and contemporary relevance of conservative liberalism and Ordo liberalism as liberalism confronts a new transformational crisis at the beginning of the new millennium Is their promise of disciplining democracy and the market a hollow one

Economic Management and French Business M. Maclean,2002-10-02 How is it that the modest pace of change which typified the French economy a century ago gave way after 1945 to a new revived capitalism and a superior economic performance Maclean traces the development of French economic and business life in the context of the European and international economy over the past fifty years She examines the main economic trends and events from nationalization to privatization from war with Germany to reconciliation and ever greater union from the franc to the euro and from national champions to mega mergers with foreign companies Maclean argues that the new French capitalism of the twenty first century is the product of an ideological struggle in which the forces of modernization triumphed over the old guard of French nationalism

Capitalism Michael Sonenscher,2022-09-20 How the history of a word sheds new light on capitalism and modern politics What exactly is capitalism How has the meaning of capitalism changed over time And what s at stake in our understanding or misunderstanding of it In Capitalism Michael Sonenscher examines the history behind the concept and pieces together the range of subjects bound up with the word Sonenscher shows that many of our received ideas fail to pick up the work that the idea of capitalism is doing for us without us even realizing it Capitalism was first coined in France in the early nineteenth century It began as a fusion of two distinct sets of ideas The first involved thinking about public debt and war finance The second involved thinking about the division of labour Sonenscher shows that thinking about the first has changed radically over time Funding welfare has been added to funding warfare bringing many new questions in its wake Thinking about the

second set of ideas has offered far less room for manoeuvre The division of labour is still the division of labour and the debates and discussions that it once generated have now been largely forgotten By exploring what lay behind the earlier distinction before it collapsed and was eroded by the passage of time Sonenscher shows why the present range of received ideas limits our political options and the types of reform we might wish for **Profits from Power** Frederick C.

Lane,1979-06-30 Of the many sources of power these essays deal with only one physical violence and the threat of violence exerted by some men over others Thus Frederic C Lane introduces his essays on profits and protection rent or the cost of protecting economic activities from the disruption of violence With the theme of protection rent Lane analyzes both particular cases such as the development of trade in the West Indies and the prosperity of sixteenth century Venice and general questions such as the role of capitalism in economic development and the economic relationships of the West to the rest of the world In prose that is always graceful and clear Lane presents his thoughts from many years of study that will be stimulating to sociologists and anthropologists as well as to economic historians Les Â©dits du Griffonaute 1er semestre 2015

examines the antagonistic relationship between new European nationalisms as these often go hand in hand with populism and the phenomenon of migration Migration has become a significant issue both in Europe and the whole world Although it has always existed much of public opinion sees it now as a problem The latter has been exaggerated through a crisis in hospitality exacerbated by the relatively recently constructed and misplaced feeling of a civilisational threat from islam Migration is then countered by the escalation of new nationalisms at least some of which are supported by populism This book offers an understanding of this conjunction of migration and nationalism in the post cold war European context More specifically the book takes up how the end of the simplified cold war cognitive binary means an unprecedented epistemological confusion and depoliticisation which takes migration as its target but could resort to other targets too Discussing the postcolonial background to the new migrations the book also considers womens rights postsocialism and the relevance of the current pandemic as the issue of migration is addressed in the context of the European crisis ridden present This wide ranging interrogation of how contemporary European migration is conceived and understood will appeal to students academics activists policy makers and others with interests in contemporary migration new nationalisms populism feminism colonial postcolonial and decolonial issues as well as socialism and postsocialism **Le rve amricain en**
