pH Deregulation as the Eleventh Hallmark of Cancer Tomas Koltai, Larry Fliegel, Stephan J. Reshkin, Fatima Baltazar, Rosa Angela Cardone, Khalid Omer Alfarouk, Julieta Afonso, 2023-07-03 pH Deregulation as the Eleventh Hallmark of Cancer presents key concepts about pH deregulation in a concise and straight forward manner The book discusses topics such as pH regulation and metabolism sodium hydrogen exchanger monocarboxylate transporter V ATPase proton pump carbonic anhydrases and voltage gated sodium channels In addition it covers clinical and therapeutic implications and future perspectives This is a valuable resource for researchers oncologists students and members of the biomedical and medical fields who want to learn more about the role of pH deregulation in cancer treatment pH deregulation can improve the outcome of classical treatments without adding toxicity to them and the book shows that treating the pH peculiarities of cancer is simple and can be performed with existing drugs Based on the classification of tumor malignancy in ten hallmarks the authors put pH deregulation at the spotlight and separated from metabolic reprogramming due to its impact on all other hallmarks proposing it as an additional characteristic to evaluate and fight cancer Proposes that pH deregulation should be considered as an independent hallmark of cancer from metabolic reprogramming due to its impact on all other hallmarks based on seminal work of Hanahan and Weinberg Explains basic issues of cancer pH deregulation and its consequences in a simple and concise manner Discusses the subject from the start with very elementary concepts on pH and pH regulation to help readers understand key concepts without proper background Presents key concepts through original illustrations and table for easy comprehension

Metabolism in Cancer Thorsten Cramer, Clemens A. Schmitt, 2016-08-24 This textbook presents concise chapters written by internationally respected experts on various important aspects of cancer associated metabolism offering a comprehensive overview of the central features of this exciting research field The discovery that tumor cells display characteristic alterations of metabolic pathways has significantly changed our understanding of cancer while the first description of tumor specific changes in cellular energetics was published more than 90 years ago the causal significance of this observation for the pathogenesis of cancer was only discovered in the post genome era The first 10 years of the twenty

first century were characterized by rapid advances in our grasp of the functional role of cancer specific metabolism as well as the underlying molecular pathways Various unanticipated interrelations between metabolic alterations and cancer driving pathways were identified and currently await translation into diagnostic and therapeutic applications Yet the speed quantity and complexity of these new discoveries make it difficult for researchers to keep up to date with the latest developments an issue this book helps to remedy

Precambrian Geotectonics in the Himalaya B.K. Chakrabarti, 2023-06-22 Precambrian Geotectonics in the Himalaya provides a deep overview on geology and tectonics of the Precambrian domains of the Himalaya Authored by an expert with over five decades of work in Precambrian Himalaya the book studies Window zones to provide a scope for understanding Precambrian deformation effects The book specifically covers the holistic Precambrian geotectonic of the terrain and revises the subduction back thrusting model of the Cenozoic evolution Considering Precambrian regional events are not clearly recognised or visualised in many sectors due to overlapping crystallines this book details a Precambrian geotectonic framework of the terrain on which the Himalayan event evolved Precambrian Geotectonics in the Himalaya is a necessary reference for Earth scientists exploration and hazard management scientists professors and students who carry out research what requires a comprehensive picture of the Precambrian Himalaya and in totality with the adjacent peninsula Features comprehensive data gathered from decades of research on the Himalaya Includes numerous detailed case studies that allow readers to comprehensively consider the data presented Describes the Precambrian tectonostratigraphic history of the Himalayan terrain

Tumor Microenvironment Jacinta Serpa, 2020-03-04 The way a cell undergoes malignant transformation should meet their capacity of surviving in the microenvironment of the organ where the cancer will develop Metabolic adaptation is for sure one of the criteria that must be accomplished driven by metabolic plasticity that allows the adaptation of cancer cells to the availability of energy and biomass sources that will sustain cell survival and proliferation Each human organ has a particular microenvironment which depends on several cell types and in some cases also on symbiotic microorganisms These biological partners are constantly sharing organic compounds and signaling molecules that will control mitogenesis cell death and differentiation accounting for the organ s function Nevertheless cancer cells are capable of taking advantage of this metabolic and signaling microenvironmental dynamics In this book we intend to present the different components of the microenvironment driving the metabolic fitness of cancer cells Themetabolic changes required for establishing a tumor in a given microenvironment and how these metabolic changes limit the response to drugs will generally be the major items addressed It is important to mention not only aspects of the microenvironment that stimulate metabolic changes and that select better adapted tumor cells but also how this regulation of cell plasticity is made Thus the signaling pathways that orchestrate and are orchestrated throughout this panoply of metabolic rearrangements will also be addressed in this book The subjects will be presented from the conceptual point of view of the cross cancer mechanisms and also particularizing some models that can be examples and enlightening
