Maria del Mar, 2020-02-07 English medium instruction EMI has become a pervasive teaching model in recent higher
education The implementation of EMI programs requires changes in university teaching methods since most lecturers need
to adapt their contents and the way they teach them to successfully work in foreign language environments The rapid
proliferation of such programs has resulted in concern among teaching staff who have felt pushed towards teaching their
subject content through a non native language with little or no previous training As a result many recent studies have
highlighted the importance and urgency to train teaching staff in terms of language proficiency and the appropriate teaching
methods techniques and strategies to be applied in EMI lessons Teacher Training for English Medium Instruction in Higher
Education is an academic research publication that provides comprehensive research on effective approaches and
experiences in teacher training for EMI at universities both in terms of language skills and teaching methodologies and that
analyzes the design and development of comprehensive teacher training programs that successfully engage these EMI
programs It has profound implications for the development of the international profile of higher education institutions as it
provides information on how to train highly qualified lecturers to successfully teach students from different nationalities
Featuring a wide range of topics such as assessment curriculum design and learning styles this book is ideal for pre and in
