Wilson, Ralph W. Adler, 2013-09-13 The increasing pace of global conformance towards the adoption of International Financial Reporting Standards IFRS highlights the need for accounting students as well as accounting practitioners to be conversant with IFRS Teaching IFRS offers expert descriptions of and insights into the IFRS convergence process from a teaching and learning perspective Hence this book is both timely and likely to have considerable impact in providing guidance for those who teach financial reporting around the world The contents of the book come from authoritative sources and offer something distinctive to complement the existing textbooks which typically focus on the technical aspects of IFRS and their adoption Drawing upon the experiences of those who have sought to introduce IFRS related classroom innovations and the associated student outcomes achieved therefrom the book offers suggestions about how to design and deliver courses dealing with IFRS and catalogues extensive listings of IFRS related teaching resources to support those courses This book was originally published as a special issue of Accounting Education An international journal Business Books and Serials in Print , 1977 **The Oxford Handbook of Public Heritage Theory and Practice** Angela M. Labrador, Neil Asher Silberman, 2018-07-11 The field of cultural heritage is no longer solely dependent on the expertise of art and architectural historians archaeologists conservators curators and site and museum administrators It has dramatically expanded across disciplinary boundaries and social contexts with even the basic definition of what constitutes cultural heritage being widened far beyond the traditional categories of architecture artifacts archives and art Heritage now includes vernacular architecture intangible cultural practices knowledge and language

performances and rituals as well as cultural landscapes Heritage has also become increasingly entangled with the broader social political and economic contexts in which heritage is created managed transmitted protected or even destroyed Heritage protection now encompasses a growing set of methodological approaches whose objectives are not necessarily focused upon the maintenance of material fabric which has traditionally been cultural heritage s primary concern The Oxford Handbook of Public Heritage Theory and Practice charts some of the major sites of convergence between the humanities and the social sciences where new disciplinary perspectives are being brought to bear on heritage These convergences have the potential to provide the interdisciplinary expertise needed not only to critique but also to achieve the intertwined intellectual political and socioeconomic goals of cultural heritage in the twenty first century This volume highlights the potential contributions of development studies political science anthropology management studies human geography ecology psychology sociology cognitive studies and education to heritage studies
