proponents expectations particularly with respect to water supply to the urban poor And given the apparent shortcomings of both privatization and conventional approaches to government provision what are the alternatives In answering these questions Bakker engages with broader debates over the role of the private sector in development the role of urban communities in the provision of public services and the governance of public goods She introduces the concept of governance failure as a means of exploring the limitations facing both private companies and governments Critically examining a range of issues including the transnational struggle over the human right to water the commons as a water supply management strategy and the environmental dimensions of water privatization *Privatizing Water* is a balanced exploration of a critical issue that affects billions of people around the world

The Communicated Stereotype Anastacia Kurylo, 2013-06-20 The Communicated Stereotype From Celebrity Vilification to Everyday Talk argues that a consequential interactional dilemma is enacted when people communicate stereotypes in everyday talk The interactional dilemma is a result of the tension between a political correctness movement that prescribes against the communication of stereotypes and the benefits gained from communicating these in conversation Despite the punishment and shame that befalls celebrities who communicate stereotypes people continue to communicate stereotypes in everyday conversation often evoking little if any outrage The Communicated Stereotype advances previous theory and research related to group categorization stereotype maintenance and functional discourse analytic and critical approaches by demonstrating the process whereby the vilification of celebrities diverts attention from the everyday communication of stereotypes and emboldens people to communicate stereotypes without self criticism The way this interactional dilemma is handled in conversation helps to explain why stereotypes are maintained over time within a culture despite deterrents intended to dissuade people from using them An appreciation of stereotypes as poor communication choices provides the potential for the reduction of stereotype use
