Kloosterman, 2015-08-27 In the past two decades several millions of IT enabled services jobs have been relocated or offshored from the US and Europe to in particular low cost economies around the world Most of these jobs so far have landed in South and South East Asia with India and the Philippines receiving the bulk of them This has caused profound changes in the international division of labour and has had correspondingly wide social and economic effects This book examines how

this next wave in globalization affects people and places in South and South East Asia It brings together twelve case studies from India the Philippines China Hong Kong and Thailand and explores how and for whom services offshoring creates opportunities triggers local economic transformations and produces challenges This book in addition compares how different countries take part in this second global shift investigates service sector driven economic development from a historical perspective and engages with the question whether and to what extent services offer a new promising avenue of sustained economic growth for developing countries It argues that service led development in developing countries is not easy for all the workers involved or a guaranteed path to sustained economic development and prosperity This volume stands out from other books in the field in its exploration of the social and economic outcomes in the cities and countries where services have been located Based on cutting edge empirical research and original data the volume offers a state of the art contribution to this growing debate The book provides valuable insights for students scholars and professionals interested in services offshoring socio economic development and contemporary transformations in South and South East Asia

On Unemployment Mark R. Reiff, 2015-10-07

With unemployment at historically high rates that show signs of becoming structural there is a pressing need for an in depth exploration of this economic injustice Unemployment is one of the problems most likely to put critical pressure on our political institutions disrupt the social fabric of our way of life and even threaten the continuation of liberalism itself Despite the obvious importance of the problem of unemployment however there has been a curious lack of attention paid to this issue by contemporary non Marxist political philosophers On Unemployment explores the moral implications of the problem of unemployment despite the continuing uncertainty involving both its causes and its cures Reiff takes up a series of questions about the nature of unemployment and what justice has to tell us about what we should do if anything to alleviate it The book comprehensively discusses the related theory and suggests how we might implement these more general observations in the real world It addresses the politics of

unemployment and the extent to which opposition to some or all of the book's various proposals stem not from empirical disagreements about the best solutions but from more basic moral disagreements about whether the reduction of unemployment is indeed an appropriate moral goal. This exciting new text will be essential for scholars and readers across business economics and finance as well as politics philosophy and sociology.

Making College Work Harry J. Holzer, Sandy Baum, 2017-08-15

Practical solutions for improving higher education opportunities for disadvantaged students. Too many disadvantaged college students in America do not complete their coursework or receive any college credential while others earn degrees or certificates with little labor market value. Large numbers of these students also struggle to pay for college and some incur debts that they have difficulty repaying. The authors provide a new review of the causes of these problems and offer promising policy solutions. The circumstances affecting disadvantaged students stem both from issues on the individual side such as weak academic preparation and financial pressures and from institutional failures. Low income students disproportionately attend schools that are underfunded and have weak performance incentives contributing to unsatisfactory outcomes for many students. Some solutions including better financial aid or academic supports target individual students. Other solutions such as stronger linkages between coursework and the labor market and more structured paths through the curriculum are aimed at institutional reforms. All students and particularly those from disadvantaged backgrounds also need better and varied pathways both to college and directly to the job market beginning in high school. We can improve college outcomes but must also acknowledge that we must make hard choices and face difficult tradeoffs in the process. While no single policy is guaranteed to greatly improve college and career outcomes, implementing a number of evidence-based policies and programs together has the potential to improve these outcomes substantially.

Postcolonialism Tariq Jazeel, 2019-02-22

Postcolonialism is a book that examines the influence of postcolonial theory in critical geographical thought and scholarship. Aimed at advanced level students and researchers, the book is a lively stimulating and relevant introduction to postcolonial geography that elaborates on the critical interventions in social cultural and political life. This important subfield is poised to make the book structured around three intersecting parts: Spaces, Identity, hybridity. Knowledge that broadly follows the trajectory of postcolonial studies since the late 1970s. It comprises ten main chapters, each of which is situated at the intersections of postcolonialism and critical human geography. In doing so, Postcolonialism develops three key arguments. First, that postcolonialism is best conceived as an intellectually creative and practical set of methodologies or approaches for critically engaging existing manifestations of power and exclusion in everyday life and in taken-as-given spaces. Second, that postcolonialism is at its core concerned with the politics of representation both in terms of how people and space are represented but also the politics surrounding who is able to represent themselves and on what whose terms. Third, the book argues that postcolonialism itself is an inherently geographical intellectual enterprise despite its origins in literary theory. In developing these arguments and addressing a

series of relevant and international case studies and examples throughout Postcolonialism not only demonstrates the importance of postcolonial theory to the contemporary critical geographical imagination It also argues that geographers have much to offer to continued theorizations and workings of postcolonial theory politics and intellectual debates going forward This is a book that brings critical analyses of the continued and omnipresent legacies of colonialism and imperialism to the heart of human geography but also one that returns an avowedly critical geographical disposition to the core of interdisciplinary postcolonial studies
