Mobility and Migration Choices Martin van der Velde,Ton van Naerssen,2016-03-03 The crossing of national state borders is one of the most discussed issues of contemporary times and it poses many challenges for individual and collective identities This concerns both short distance mobility as well as long distance migration Choosing to move or not across international borders is a complex decision involving both cognitive and emotional processes This book tests the approach that three crucial thresholds need to be crossed before mobility occurs the individual s mindset about migrating the choice of destination and perception of crossing borders to that location and the specific routes and spatial trajectories available to get there Thus both borders and trajectories can act as thresholds to spatial moves The threshold approach with its focus on processes affecting whether when and where to move aims to understand the decision making process in all its dimensions in the hope that this will lead to a better understanding of the ways migrants conceive perceive and undertake their transnational journeys This book examines the three constitutive parts discerned in the cross border mobility decision making process people borders and trajectories and their interrelationships Illustrated by a global range of case studies it demonstrates that the relation between the three is not fixed but flexible and that decision making contains aspects of belonging instability security and volatility affecting their mobility or immobility

The Drone Memos Jameel Jaffer,2010-01-12 A trenchant summation and analysis of the legal rationales behind the US drone policy of targeted killing of suspected terrorists including US citizens Publishers Weekly starred review In the long response to 9 11 the US government initiated a deeply controversial policy of targeted killing the extrajudicial execution of suspected terrorists and militants typically via drones A remarkable effort was made to legitimize this practice one that most human rights experts agree is illegal and that the United States has historically condemned In The Drone Memos civil rights lawyer Jameel Jaffer presents and assesses the legal memos and policy documents that enabled the Obama administration to put this program into action In a lucid and provocative introduction Jaffer who led the ACLU legal team that secured the release of many of the documents evaluates the drone memos in light of domestic and international law He connects the documents legal abstractions to the real world violence they allow and makes the case that we are trading core principles of democracy and human rights for the illusion of security A careful study of a secretive counterterrorism infrastructure capable of sustaining endless orderless war this book is profoundly necessary Katrina vanden Heuvel editor and publisher of The Nation

1916 Kieran Allen,2016-01-20 A few minutes after noon on the 24th April 1916 Patrick Pearse stepped outside the newly occupied GPO on Sackville Street with a copy of the Proclamation of the Irish Republic Reading aloud he declared a strike for Irish freedom against the world s greatest imperial power The Easter Rising as the six days of intense bloody fighting that followed came to be known set the course for the next 100 years of Irish history the Heroes of 16 becoming a national cultural and political touchstone down the generations But today canonised and mummified the radical visions of Pearse and the socialist James Connolly are an awkward encumbrance on an Irish state that has its roots in the counter revolution of the civil war and which has emerged as a haven of economic neoliberalism In this fascinating alternative history of modern Ireland Kieran Allen follows the thread of 1916 s revolutionary tradition an uneasy marriage of Socialism and Republicanism as it has unravelled across the century From the strikes boycotts occupations and land redistribution that accompanied the war of independence to the carnival of reaction that followed all the way up to the current movement against water charges and austerity Allen reveals the complexities ruptures and continuities of a revolutionary tradition that continues to haunt the establishment today

The Northeast Question Pradip Phanjoubam,2015-12-14 This book explores the idea psychology and political geography of Northeast India as forged by two interrelated but autonomous meta narratives First the politics of conflict inherent in and therefore predetermined by physical geography and second the larger geopolitics

that was unfolding during the colonial period Unravelling the history behind the turmoil engulfing Northeast India the study contends that certain geographies most pertinently fertile river valleys and surrounding mountains which feed the rivers are integral to nature and any effort to disrupt this cohesion will result in conflict It comprehensively traces the geopolitics of the region since colonial era in particular the Great Game the politics that went into the making of the McMahon Line the Radcliffe Line and the Pemberton Line the region's relations with its international neighbours China Bhutan Myanmar Bangladesh and Nepal as well as the issue of many formerly non state bearing populations awakening to the reality of the modern state Lucid and analytical this book will be of great interest to scholars and researchers of Northeast India modern Indian history international relations defence and strategic studies and political science *The Routledge Companion to Intangible Cultural Heritage* Michelle L. Stefano, Peter Davis, 2016-12-08 This collection provides an in depth and up to date examination of the concept of Intangible Cultural Heritage and the issues surrounding its value to society Critically engaging with the UNESCO 2003 Convention for the Safeguarding of the Intangible Cultural Heritage the book also discusses local level conceptualizations of living cultural traditions practices and expressions and reflects on the efforts that seek to safeguard them Exploring a global range of case studies the book considers the diverse perspectives currently involved with intangible cultural heritage and presents a rich picture of the geographic socioeconomic and political contexts impacting research in this area With contributions from established and emerging scholars public servants professionals students and community members this volume is also deeply enhanced by an interdisciplinary approach which draws on the theories and practices of heritage and museum studies anthropology folklore studies ethnomusicology and the study of cultural policy and related law The Routledge Companion to Intangible Cultural Heritage undoubtedly broadens the international heritage discourse and is an invaluable learning tool for instructors students and practitioners in the field *Chinese Foreign Relations with Weak Peripheral States* Jeffrey Reeves, 2015-10-08 This book examines China's relations with its weak peripheral states through the theoretical lens of structural power and structural violence China's foreign policy concepts toward its weak neighbouring states such as the One Belt One Road strategy are premised on the assumption that economic exchange and a commitment to common development are the most effective means of ensuring stability on its borders This book however argues that China's overreliance on economic exchange as the basis for its bilateral relations contains inherently self defeating qualities that have contributed and can further contribute to instability and insecurity within China's periphery Unequal economic exchange between China and its weak neighbours results in Chinese influence over the state's domestic institutions what this book refers to as structural power Chinese structural power in turn can undermine the state's development contribute to social unrest and exacerbate existing state society tensions what this book refers to as structural violence For China such outcomes lead to instability within its peripheral environment and raise its vulnerability to security threats stemming from nationalism separatism terrorism transnational organised crime and drug trafficking among others

This book explores the causality between China's economically reliant foreign policy and insecurity in its weak peripheral states and considers the implications for China's security environment and foreign policy. This book will be of much interest to students of Chinese politics, Asian security studies, international political economy and IR in general. **Ukraine Over the Edge** Gordon M. Hahn, 2018-02-08 The Ukrainian crisis that dominated headlines in fall 2013 was decades in the making. Two great schisms shaped events: one within Ukraine, its western and southeastern parts divided along cultural and political lines; the other was driven by geopolitical factors. Competition between Russia and the West exacerbated Ukraine's divisions. This study focuses on the historical background and complex causality of the crisis from the rise of mass demonstrations on Kiev's Maidan Nezalezhnosti (Independence Square) to the making of the post-revolt regime. In the context of a new cold war, the author sheds light on the role of radical Ukrainian nationalists and neofascists in the February 2014 snipers massacre, the ouster of President Viktor Yanukovich and Russia's seizure of Crimea and involvement in the civil war in the eastern region of Donbass. Continuity and change before and after the Arab uprisings Paola Rivetti, Rosita Di Peri, 2017-10-02 The Arab uprisings of 2011 have sparked much scholarly discussion with regards to democratisation, the resilience of authoritarian rule, mobilisation patterns and the relationship between secularism and Islam, all under the assumption that politics has changed for good in North Africa and the Middle East. While acknowledging the post-2011 transformations taking place in the region, this book brings to the forefront an understudied yet crucial aspect related to the uprisings: namely, the interplay between continuity and change. Challenging simplified representations built around the positions that either all has changed or nothing has changed, the in-depth case studies in this volume demonstrate how elements both of continuity and rupture with the past are present in the post-uprising landscapes of Morocco, Tunisia and Egypt. Public policy, contentious politics, the process of institution making and re-making and the relations of power connecting national and international economies are at the core of the comparative investigations included in the book. The volume makes an important contribution to the study of North African politics and to the study of political change and stability by contrasting the different trajectories of the uprisings and by offering theoretical reflections on their meaning, consequences and scope. This book was originally published as a special issue of the *British Journal of Middle Eastern Studies*. *Climate Change Governance in Asia* Kuei-Tien Chou, Koichi Hasegawa, Dowan Ku, Shu-Fen Kao, 2020-07-19 Asian countries are among the largest contributors to climate change. China, India, Japan and South Korea are among the top ten largest carbon emitters in the world, with South Korea, Japan and Taiwan also some of the largest on a per capita basis. At the same time, many Asian countries, notably India, Taiwan, Japan, the Philippines and Thailand, are among those most affected by climate change in terms of economic losses attributed to climate-related disasters. Asia is an extremely diverse region in terms of the political regimes of its constituent countries and of their level of development and the nature of their civil societies. As such, its countries are producing a wide range of governance approaches to climate change. Covering the diversity of climate change governance in Asia, this book presents

cosmopolitan governance from the perspective of urban and rural communities local and central governments state society relations and international relations In doing so it offers both a valuable overview of individual Asian countries approaches to climate change governance and a series of case studies for finding solutions to climate change challenges
