Advanced Mathematical Thinking David Tall, 2006-04-11 Advanced Mathematical Thinking has played a central role in the development of human civilization for over two millennia Yet in all that time the serious study of the nature of advanced mathematical thinking what it is how it functions in the minds of expert mathematicians how it can be encouraged and improved in the developing minds of students has been limited to the reflections of a few significant individuals scattered throughout the history of mathematics In the twentieth century the theory of mathematical education during the compulsory years of schooling to age 16 has developed its own body of empirical research theory and practice But the extensions of such theories to more advanced levels have only occurred in the last few years In 1976 The International Group for the Psychology of Mathematics known as PME was formed and has met annually at different venues round the world to share research ideas In 1985 a Working Group of PME was formed to focus on Advanced Mathematical Thinking with a major aim of producing this volume The text begins with an introductory chapter on the psychology of advanced mathematical thinking with the remaining chapters grouped under three headings the nature of advanced mathematical thinking cognitive theory and reviews of the progress of cognitive research into different areas of advanced mathematics

Digital Games and Mathematics Learning Tom Lowrie, Robyn Jorgensen (Zevenbergen), 2015-10-05 Digital games offer enormous potential for learning and engagement in mathematics ideas and processes This volume offers multidisciplinary perspectives of educators cognitive scientists psychologists and sociologists on how digital games influence the social activities and mathematical ideas of learners gamers Contributing authors identify opportunities for broadening current understandings of how mathematical ideas are fostered and embedded within digital game environments In particular the volume advocates for new and different ways of thinking about mathematics in our digital age proposing that these mathematical ideas and numeracy practices are distinct from new literacies or multiliteracies The authors acknowledge that the promise of digital games has not always been realised fulfilled There is emerging and considerable evidence to suggest that traditional discipline boundaries restrict opportunities for mathematical learning Throughout the book what constitutes mathematics learnings and pedagogy is contested Multidisciplinary

viewpoints are used to describe and understand the potential of digital games for learning mathematics and identify current tensions within the field Mathematics learning is defined as being about problem solving engagement in mathematical ideas and processes and social engagement The artefact which is the game shapes the ways in which the gamers engage with the social activity of gaming In parallel the book as a textual artefact will be supported by Springer's online platform allowing for video and digital communication including links to relevant websites to be used as supplementary material and establish a dynamic communication space

Green Petroleum M. R. Islam, A. B. Chhetri, M. M. Khan, 2012-09-25 Can green petroleum reverse global warming and bring down high gasoline prices Written in non technical language for the layperson this book investigates and details how the oil and gas industry can go green with new processes and technologies thus bringing the world's most important industry closer to environmental and economic sustainability This book unravels the mysteries of the current energy crisis and argues that solutions to global warming will come only from the development of new technologies Discussed here are the reasons why petroleum operations as they are now are not sustainable how each practice treads an inherently implosive path and how each spells irreversible damage to the planet's ecosystem Fossil fuel consumption is not the culprit rather the practices involved from exploration to refining and processing are responsible for the current damage to the environment
