

## ADVANCED CONFIGURATION - ReWire

With the setup complete, VirtualDJ can be used to perform the following actions using the assigned deck:

- Control Play/Pause of the playback
- Apply VirtualDJ effects to the playback signal
- Use the Pitch control to change the pitch of the incoming source
- Sync the playback deck's pitch to other decks

## ADVANCED CONFIGURATION – RECORD LOOPBACK

VirtualDJ has the ability to record your mixes when using the internal mixer capabilities. However, when using an external mixer VirtualDJ's internal crossfader is not used. So, within the Advanced Config, you have the ability to route an input of a sound card to VirtualDJ's recording engine.

On the Advanced Config dialog, select the option 'Record Loopback' in the first drop-down. Select the sound card with the Line Input from the second drop-down. And, select the input channel combination from the last drop-down.

Now, just setup the 'Record Audio' options using the Config... button and press the 'Start Recording'. For instructions on using the 'Record Audio' features, see the 'Recording and Broadcasting' section within the User Guide.
