TITLE: Guidelines for Safe Laboratory Practices

A. DESCRIPTION

This SOP describes guidelines for safe laboratory practices, including emergency procedures, the use of personal protective equipment, general guidelines and specific guidelines for high temperature, chemical and biological safety. The goal of safe laboratory practices is that you conduct yourself and your experiments in a responsible manner so as not to endanger you or your co-workers.

B. EMERGENCY PROCEDURES

- 1) **CALL 911** to contact emergency services. If you are in doubt as to the severity of the emergency, **CALL 911!**
- 2) **FIRE.** In the event of a fire or fire hazard, such as uncontrolled combustion of a chemical or material, a hazardous gas leak or chemical spill, smoke or the odor of burning, immediately follow these procedures:
 - **ACTIVATE** the building fire alarm. If not possible or not functional, verbally notify persons in the building.
 - **CALL 911.** Provide the operator with your name, location, the nature of the emergency, the identity and amount of any chemicals involved.
 - **ISOLATE** the area and **EVACUATE** the building. Building occupants should assemble on the sidewalk and in the parking lot across St. Joseph's Drive. If possible, shut down equipment in the area. Close doors to the area. Use a portable fire extinguisher to evacuate yourself and/or others, or to control a small fire (e.g., size of waste paper basket). **DO NOT** attempt to put out a larger fire with the portable fire extinguisher.
 - **NOTIFY** the fire and/or police department respondents with details of the problem upon their arrival including the nature of the fire hazard and chemicals involved.
 - **STOP, DROP AND ROLL.** If you or someone else is on fire, drop to the ground and roll. A jacket or blanket may also be useful to smother the flames while on the ground.
