Interactive Data Visualization with Web Technologies Chad Juehring, 2013 This project is an application that generates and presents interactive data visualizations on the Internet To use the application, the user

uploads their data in the csv file format to the application's server. The application then parses the uploaded data and generates an interactive visualization that is derived from that dataset. The user may then copy and paste the application's supplied embed code into their own website or blog to present their newly generated visualization. This software is built with web programming languages and technologies including HTML5, CSS3, JavaScript, PHP, and the Processing.js, Zepto.js, and jQuery libraries.
